MAST, FOOS & CO.

SPRINGFIELD, OHIO,

MANUFACTURERS OF

**BUCKEYE**

**WROUGHT IRON FENCING,**

**CRESTINGS, ETC.**

—ALSO—

**THE IRON TURBINE WIND ENGINE,**

**BUCKEYE FORCE PUMPS,**

**BUCKEYE LAWN MOWERS,**

Buckeye Hose Reel and Lawn Sprinkler.

**I**N presenting this Catalogue of our Buckeye Iron Fencing, we desire to call your attention to the points of superior merit and the manner of constructing our Fence, as compared with those of other manufacturers. While we do not wish to refer to other kinds of fencing in criticising terms, yet we think it is to the advantage of every one desiring to purchase an iron fence, to understand the construction of the different kinds in the market, after which you will be better prepared to appreciate the superior merits of the Buckeye Iron Fence.

The Fences heretofore offered to the public were as follows: An ornamental and the other a plain Punched Rail. In the construction of the former, the strength and durability of the Fence depends entirely on the malleable ornaments; which, if one ornament should become displaced or broken, the result can readily be realized.

In regard to the latter, the plain Punched Rail, which will not admit of any ornaments, notwithstanding the holes are punched and pickets pass through the rails, yet in most cases these pickets are secured only to the bottom rail, and do not pass below that point, which detracts very much from the beauty of the fence.

In the construction of the Buckeye Fence you will find the following points of superiority:

1st. The pickets pass through each and extend below the bottom rail, adding very much to the beauty as compared with other punched rail fences.

2d. Each picket is secured at the junction of each rail by a portion of the rail being compressed into a notch in the picket.

3d. In producing the notches in our pickets we remove no material, consequently the picket is not weakened, as is the case in many other fences.

4th. In appearance, our Buckeye Fence is a combination of both the Ornamental and Plain Punched Fence, but in construction is far superior to either.

5th. You will notice in our Ornamental Fence, the pickets do not depend on the ornaments for support, but are secured entirely independent of the ornaments.

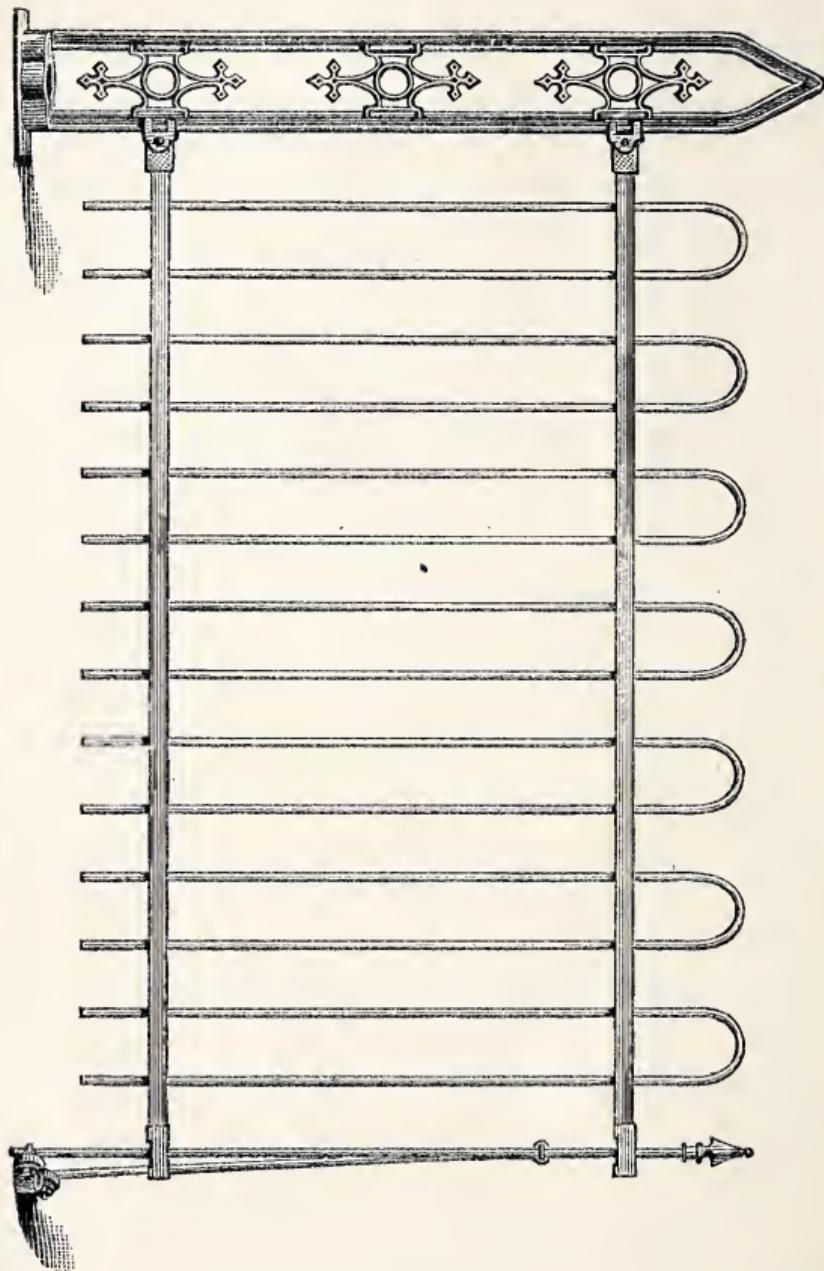

6th. The Buckeye Fence is built in the shop, complete in panels of five feet each (except when special lengths are required), by experienced workmen, with proper tools and facilities for doing the work as it should be done. Each order is thus made complete and fitted for its particular place, and when shipped is ready to set up at once without trouble, thus overcoming the annoyance of being shipped in boxes and bundles and to be built on the ground under great disadvantages, and out of just such material as is generally sent out in such cases.

7th. Our Fences are all made standard height—pickets being full 36 inches long, or 39 inches from ground to top of picket. This height seems to be the most popular; however, the Fence is so constructed that we can make it any height desired.

8th. We use heavier and stronger material than most other fence manufacturers.

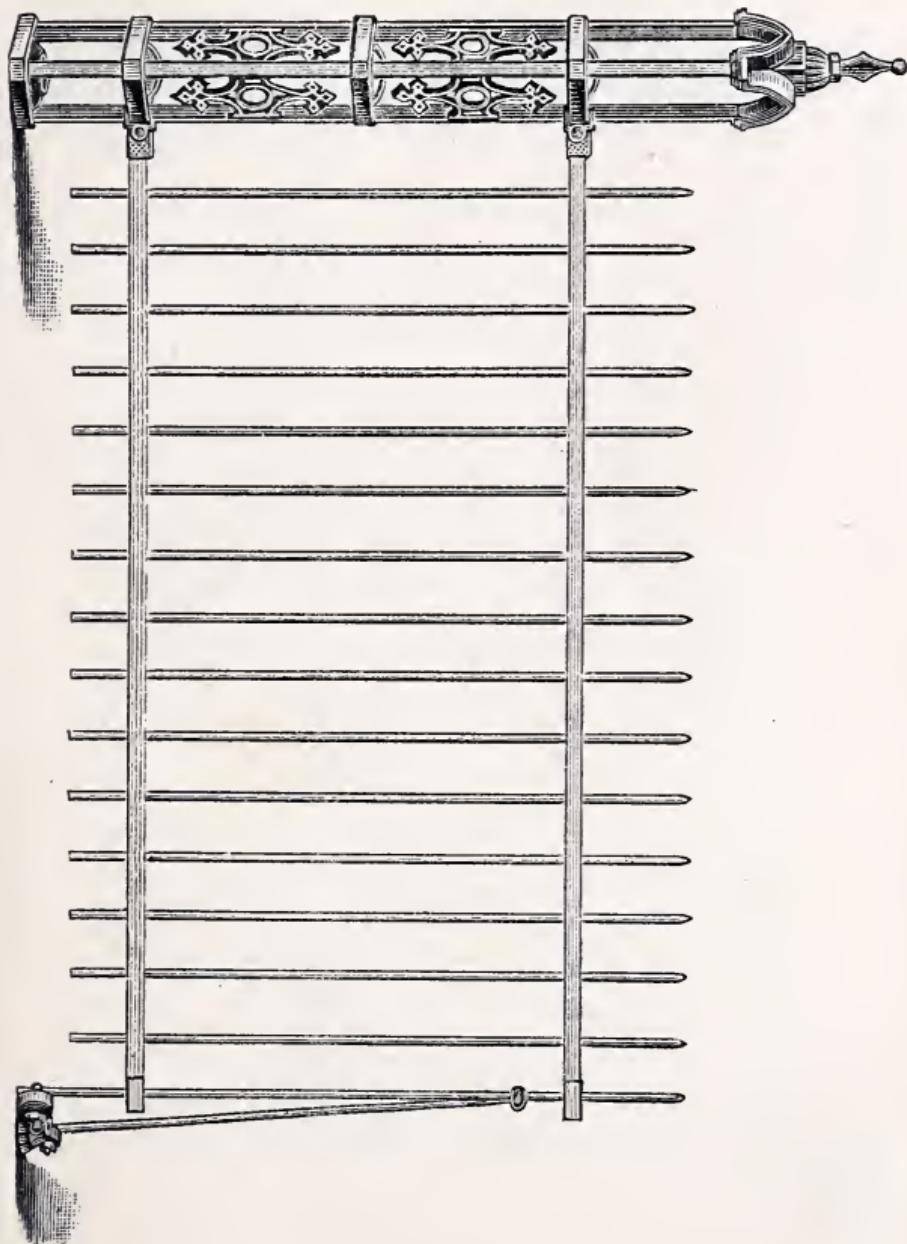

9th. It is very evident that the frost will move any fence, more or less, whether on stone or cast iron bases, consequently we make all our fences so that they can be put in perfect line at any time without disturbing the foundations. Our fences can be built to suit any grade. If over one inch to the foot it should be so stated in the order.

10th. The BUCKEYE is the best fence in the world for agents to handle, as no mechanical skill and but little time is required to erect it.

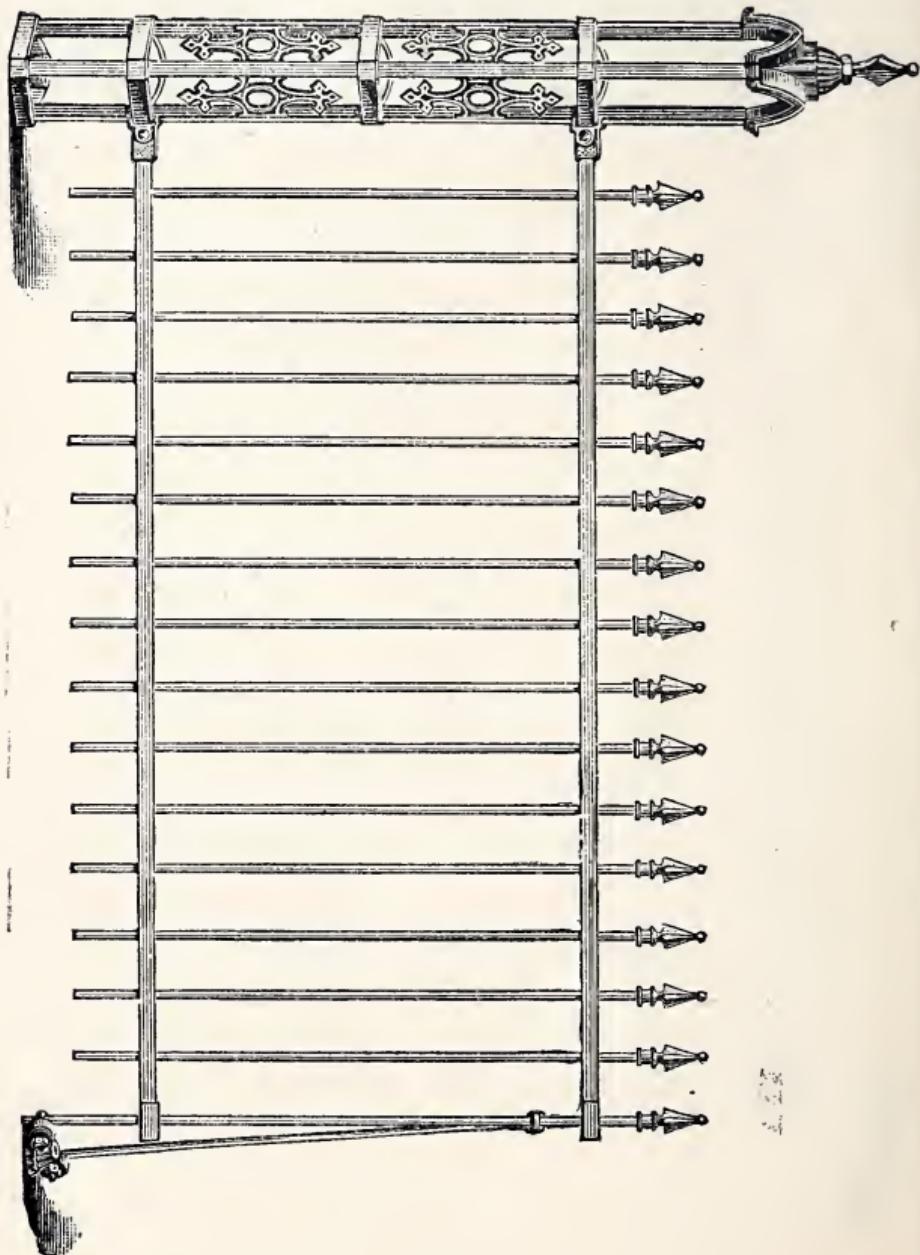

## STYLE O.

Two Rail, with bow-top picket. With this style we represent our new O post. This fence is plain but substantial, and is made of 3-8 round iron only, suitable for division fence. Would recommend our No. 2 Post on which to hang gates.

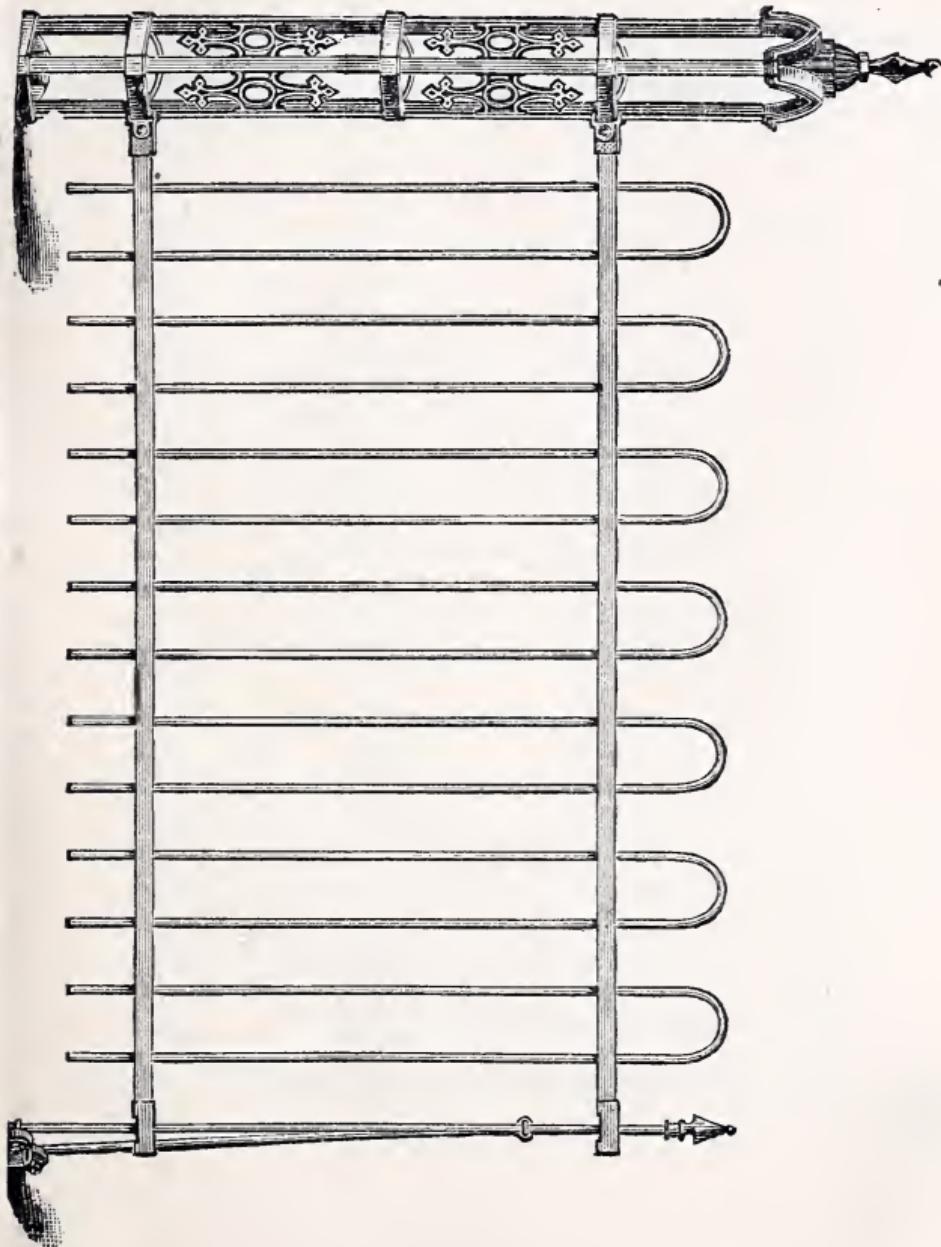

**STYLE 1.**

Two Rail, with plain-top picket. This is a plain but neat and substantial Wrought Iron Fence, suitable for cemetery lots, front or division fences. No. 2 Post. For size of rails, pickets, etc., see Price List.

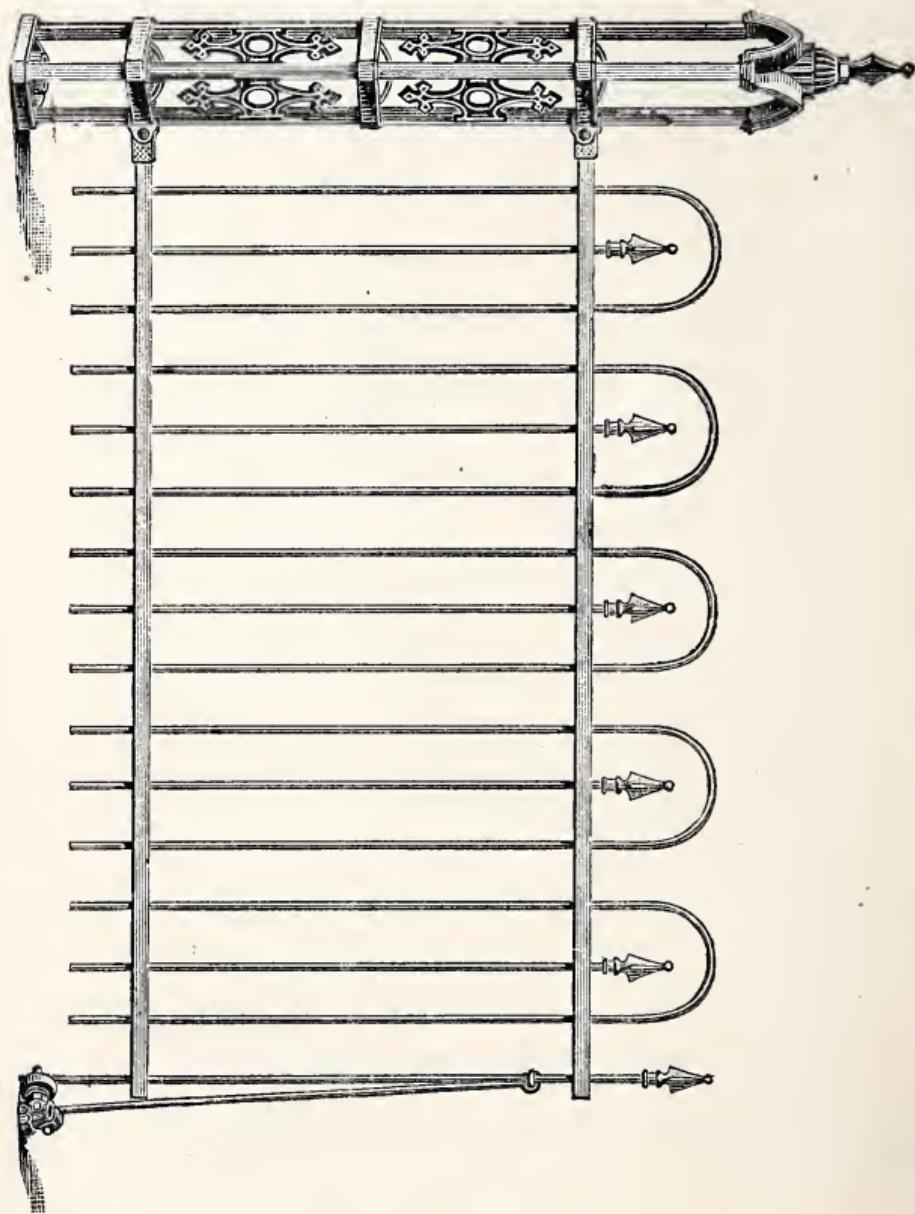

### STYLE 2.

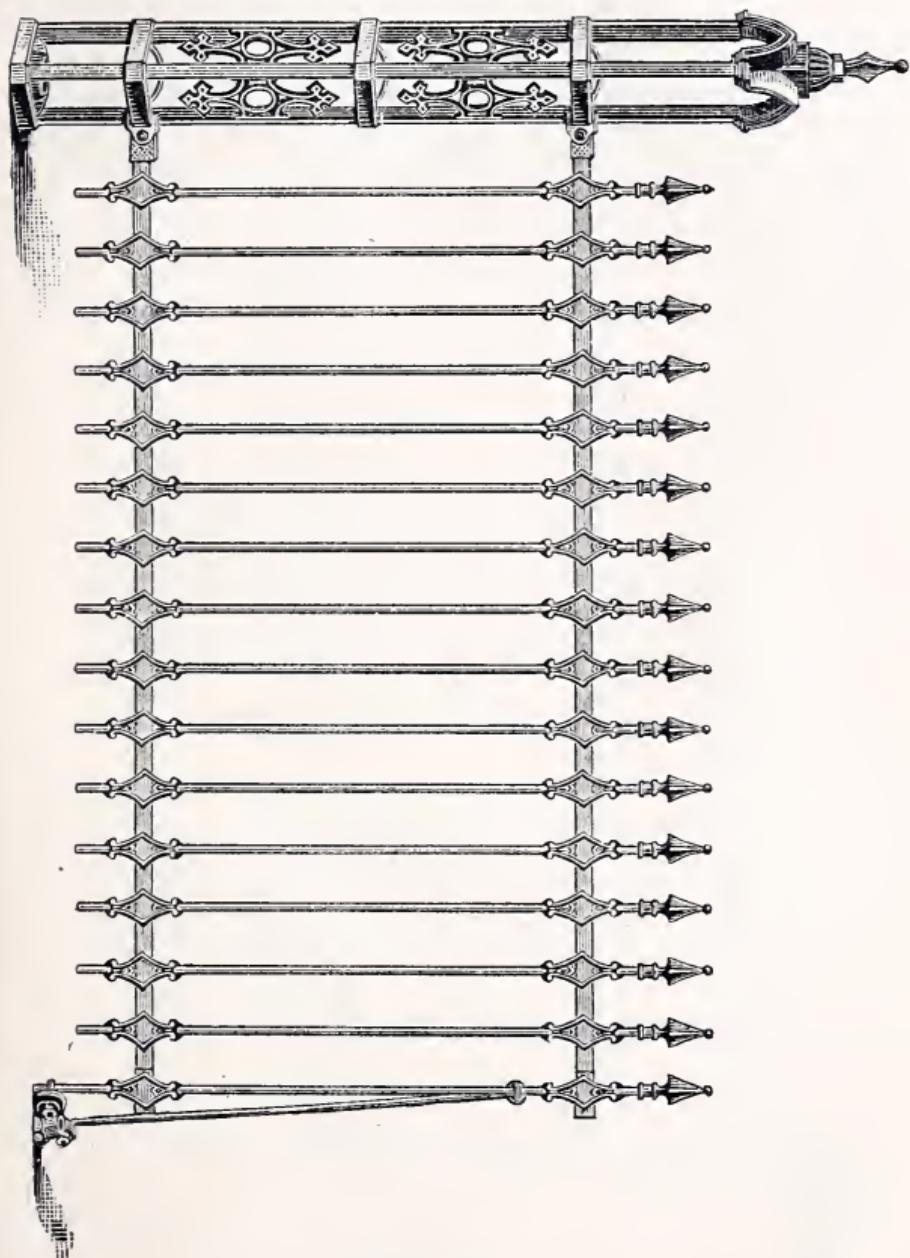

Two Rail, with spear-top pickets. This fence is similar to Style 1 in construction, the only difference being that the spear top gives it a handsomer appearance.

**STYLE 3.**

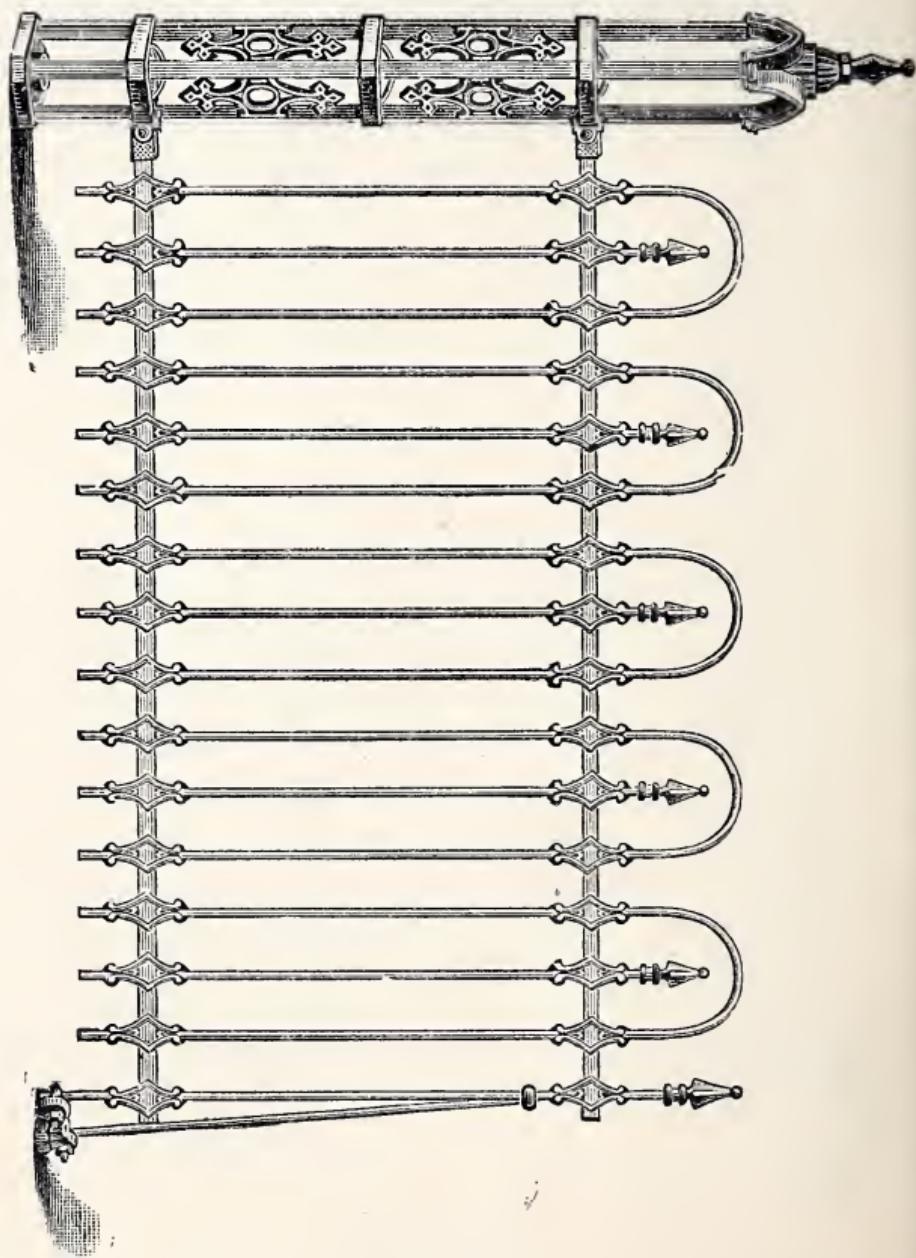

Two Rail, with bow-top picket. This fence is plain but substantial, and is suitable for residence, etc. Made only of 3-8 square or 1-2 inch round picket. No. 2 Post.

**STYLE 4.**

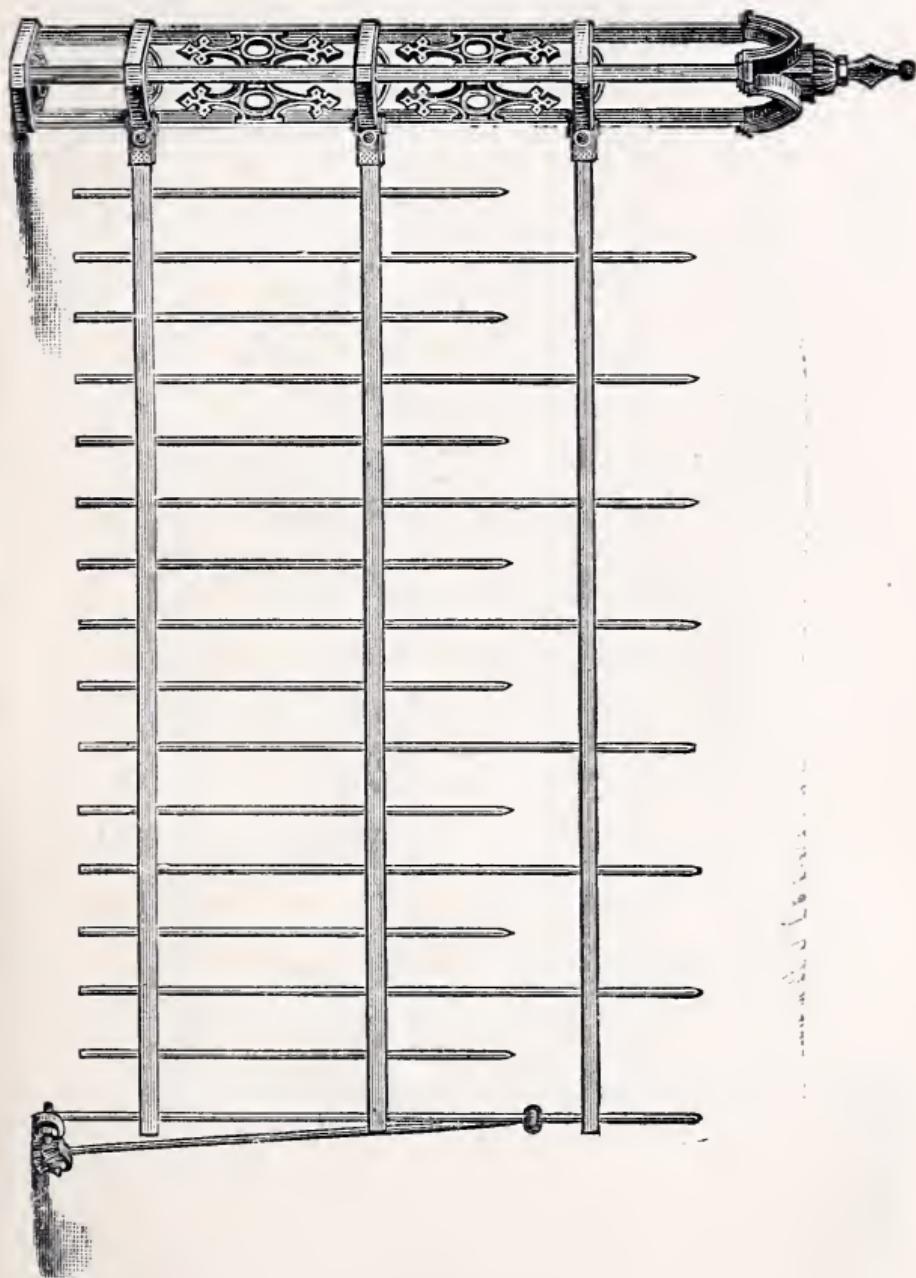

Two Rail, with six inch bow and spear-top picket. In this fence we show the picket protected by the bow, thus preventing injury to children or stock.

**STYLE 5.**

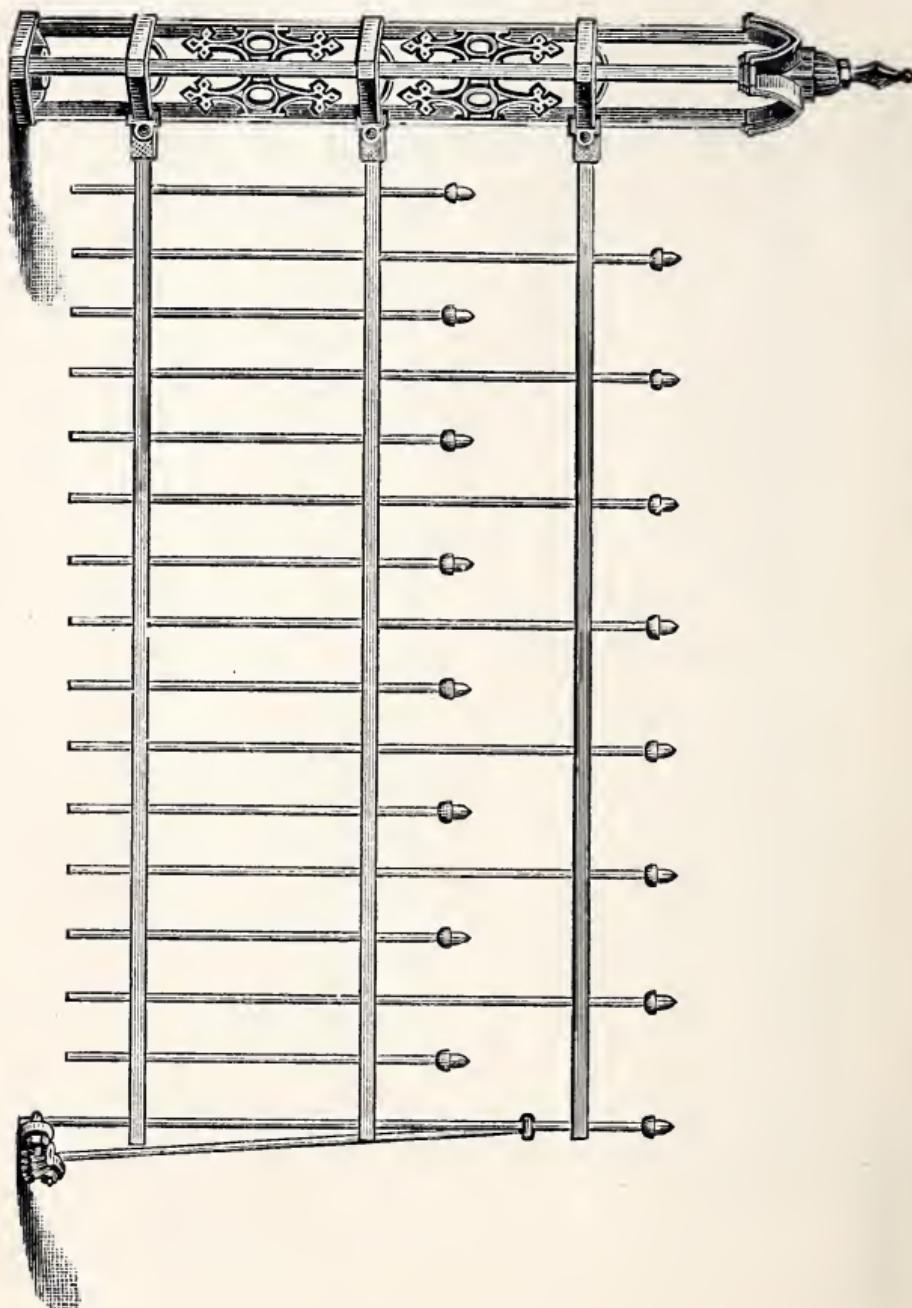

Two Rail, with spear-top picket, ornamental. Here we have a good, strong and well-proportioned fence, just ornamental enough to make it handsome. Style 5 is a great favorite.

**STYLE 6.**

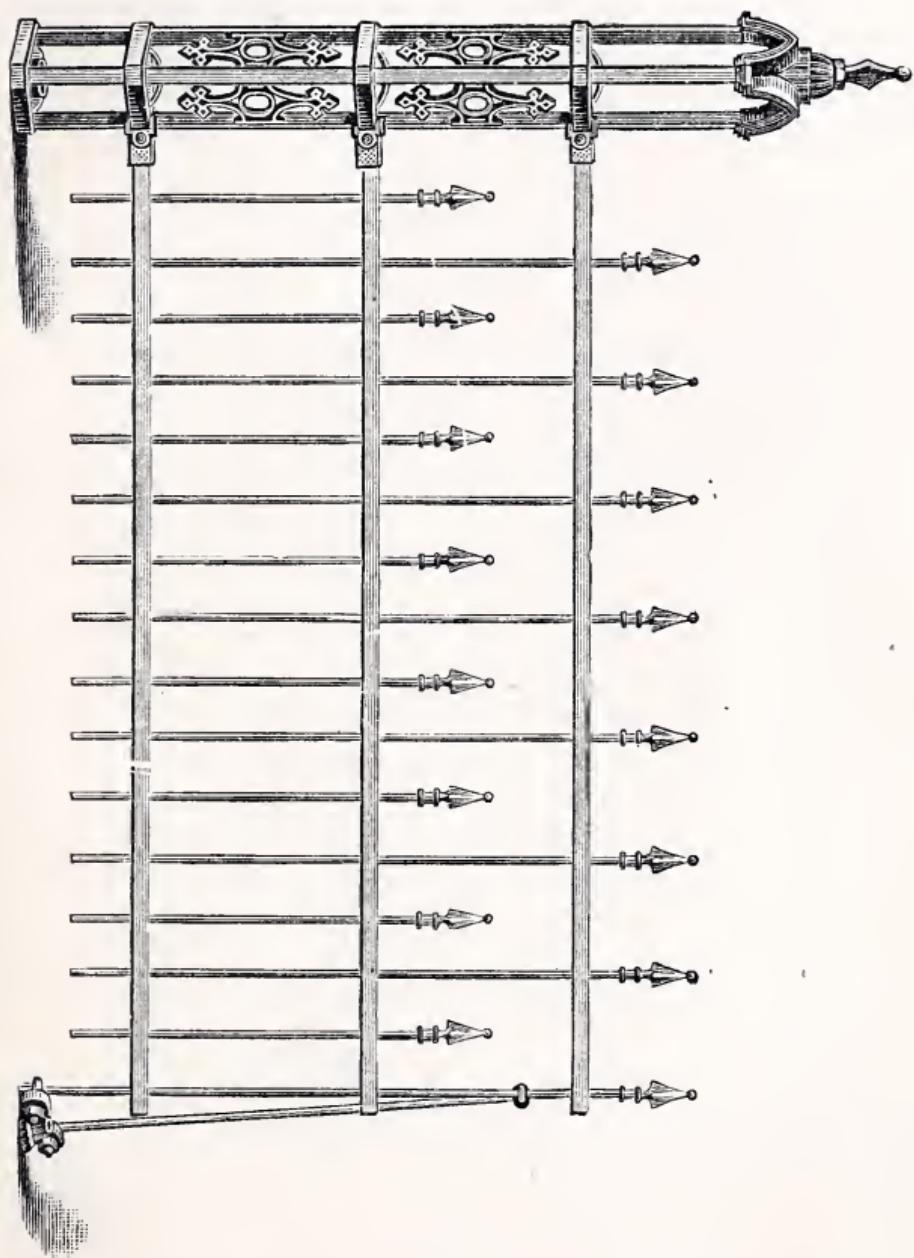

Two Rail, with 6-inch bow, and spear picket, protected by the bow. Very desirable and ornamental.

**STYLE 7.**

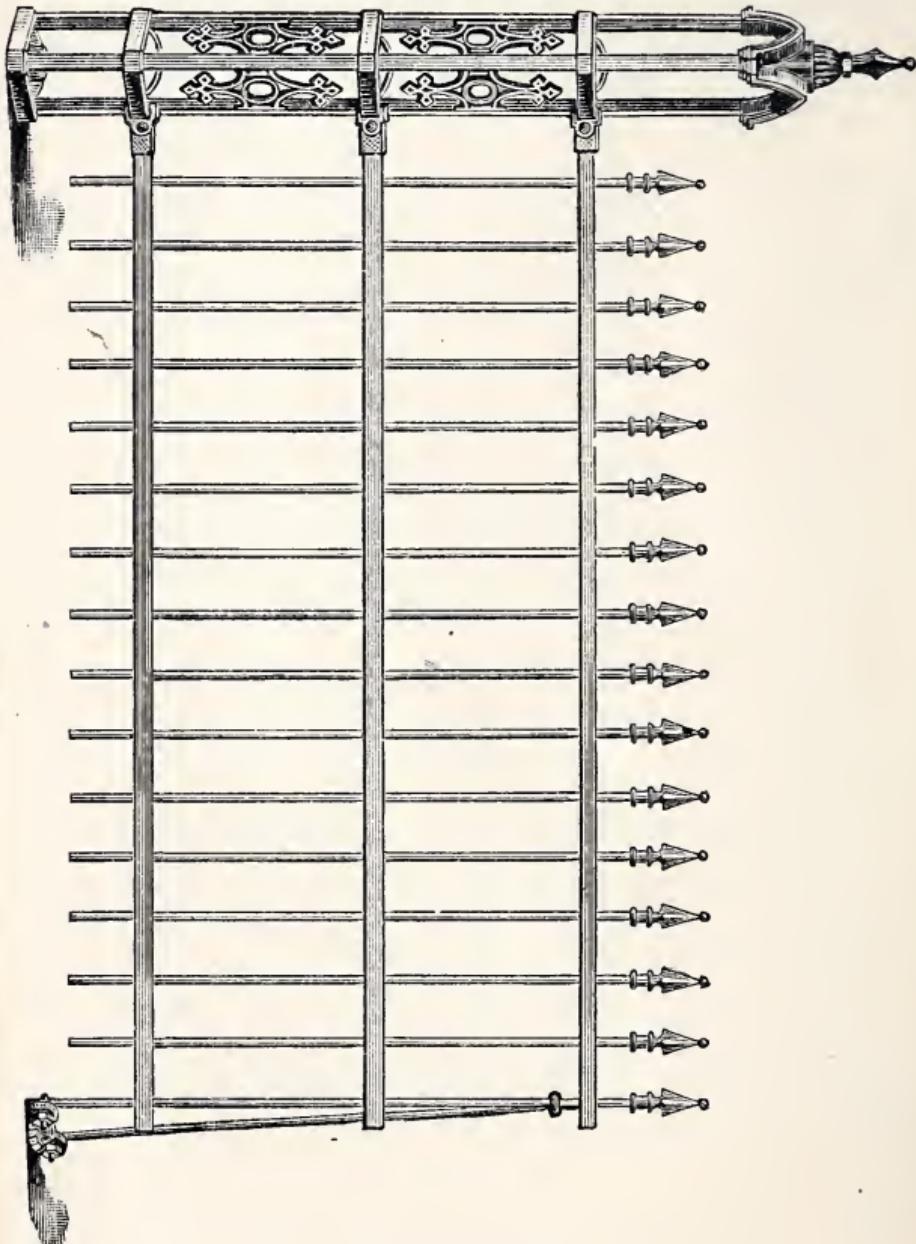

Three Rail, with long and short pickets, plain top. This fence is light and open, but sufficiently strong for front or division fences, cemetery lots, etc., when a plain, neat fence is desired.

**STYLE 8.**

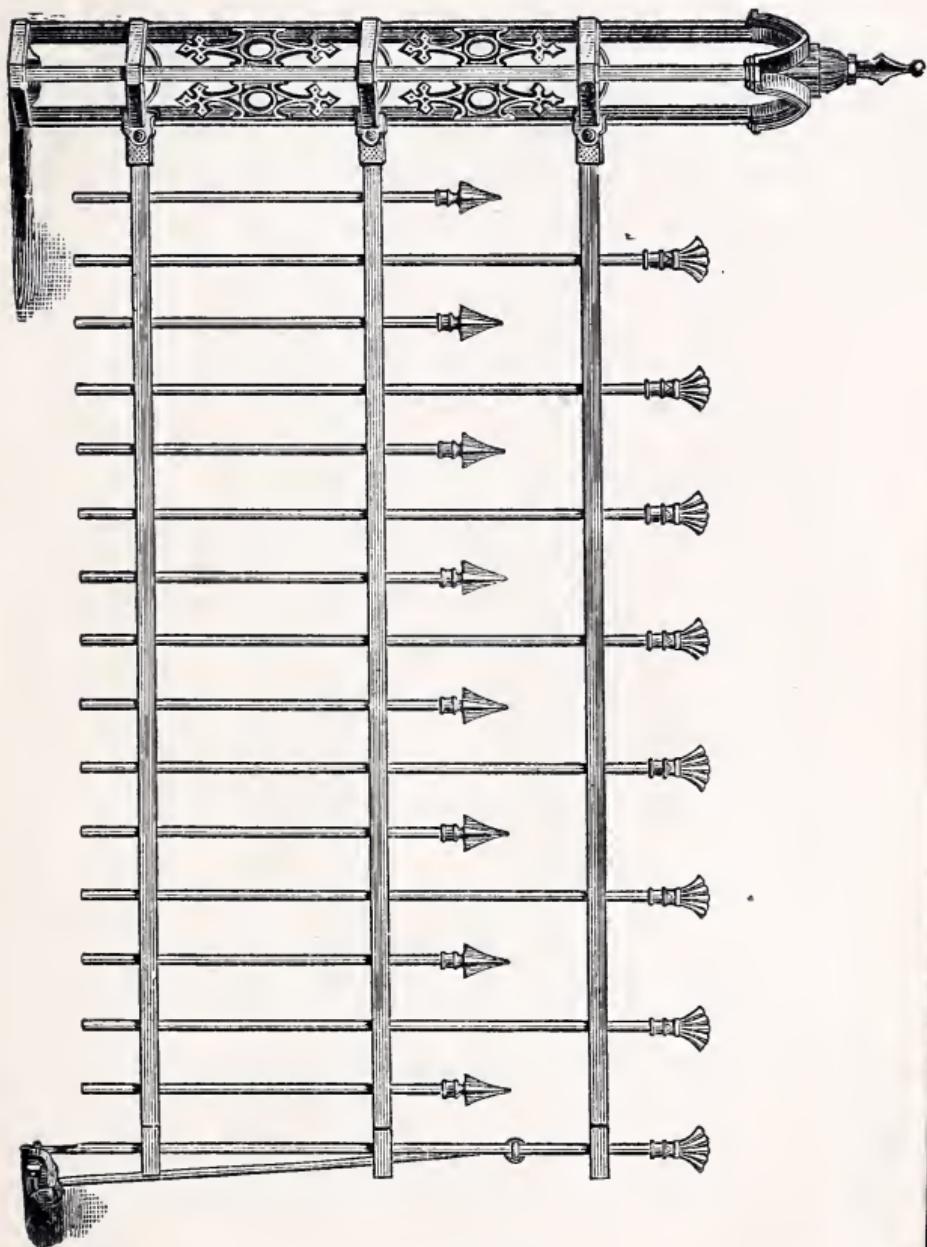

Three Rail, with long and short pickets, acorn top. A plain but strong and substantial fence, suitable for residences, parks, public grounds, etc. For size of rails, pickets, etc., see price list.

**STYLE 9.**

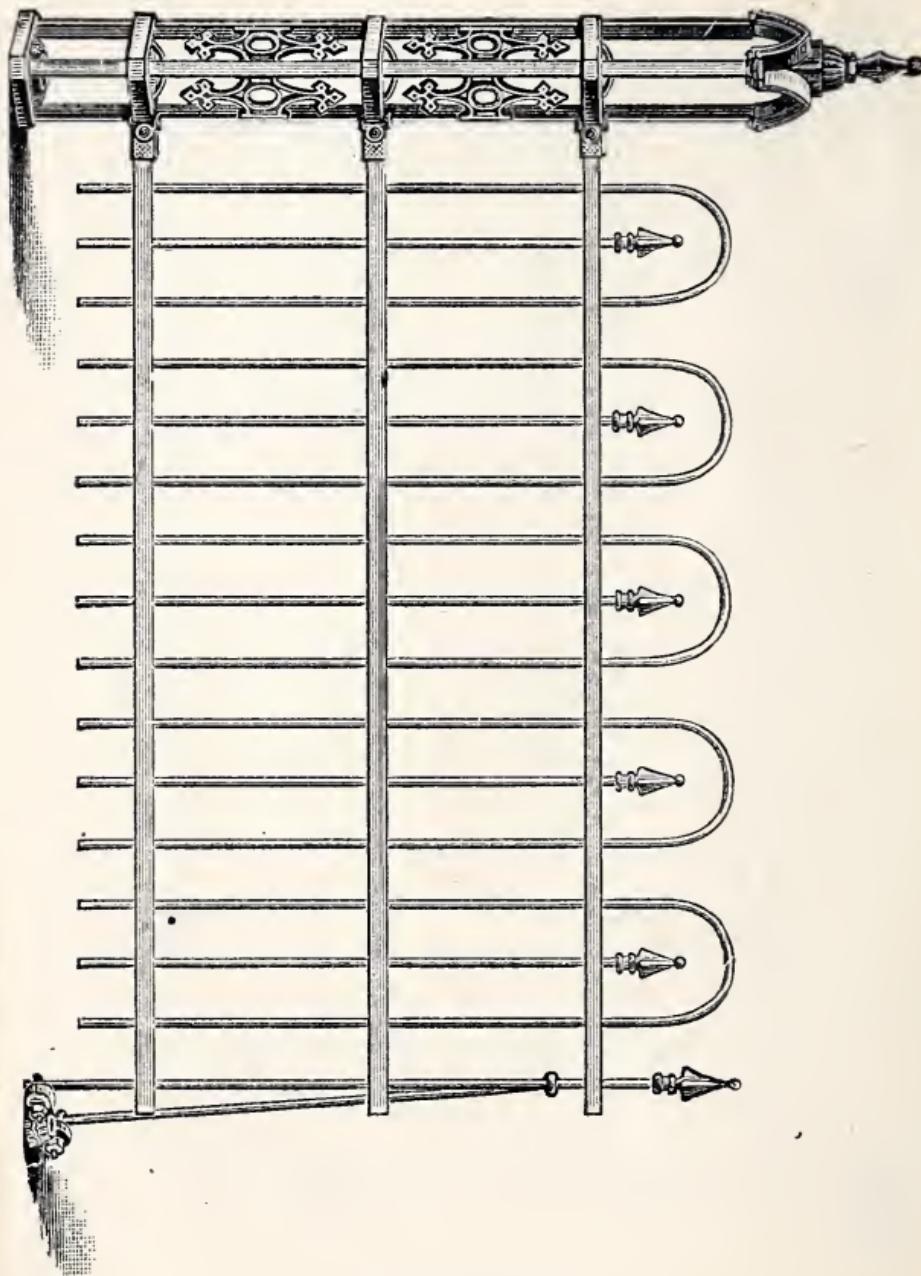

Three Rail, with long and short pickets, spear tops. This is one of the most desirable styles of plain fence we make. It is strong and durable; suitable for residences, public grounds, parks, etc. Chaste in appearance.

**STYLE 10.**

Three Rail, with all long pickets, spear top. A very substantial and desirable style, suitable for school and church yards or Court-house grounds. Neat, strong, and durable. For size of rails, pickets, etc., see price list.

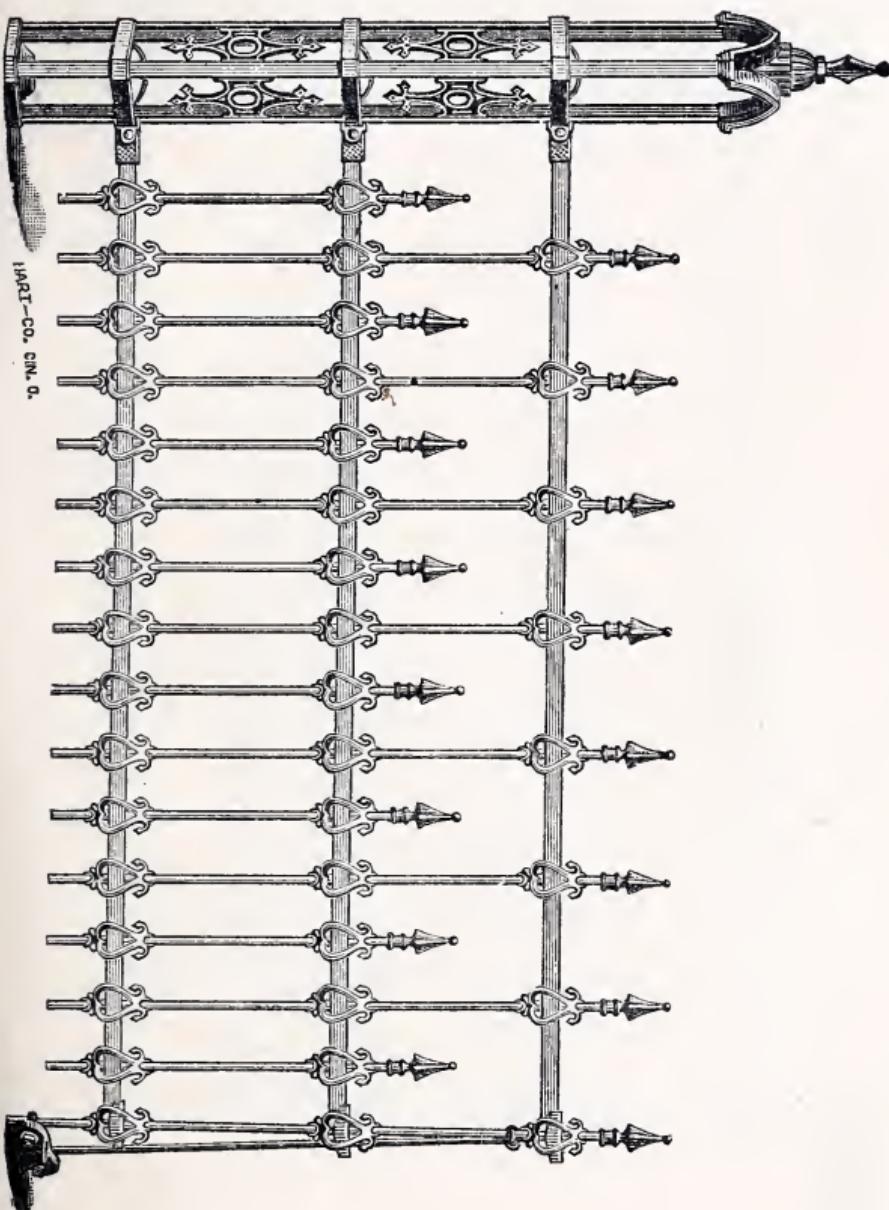

**STYLE 11.**

Three Rail, with long and short pickets. This style is similar to No. 9, with Eastlake spear-top on long picket and Roman spear on short picket; it being one of our latest styles and is very much admired. For size of rails, pickets, etc., see price list.

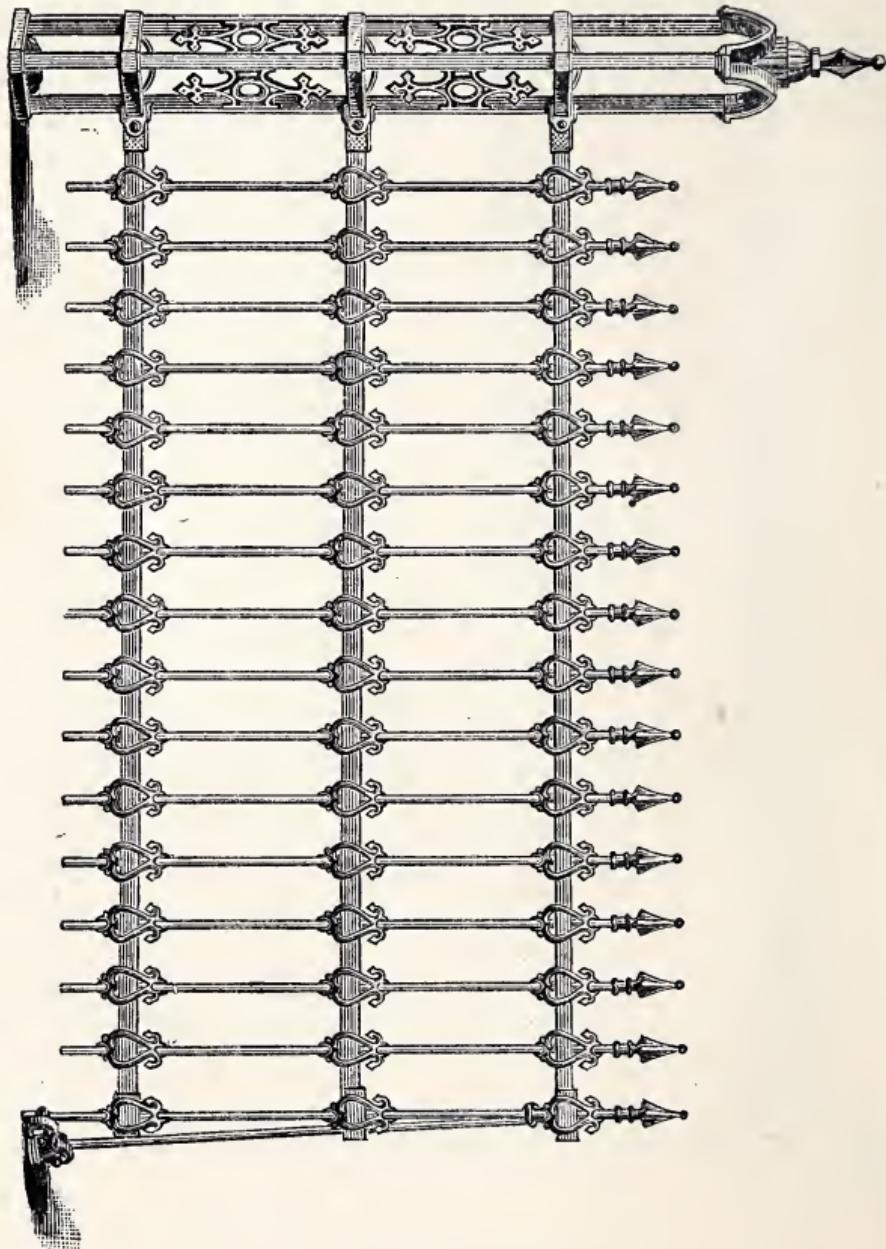

### STYLE 12.

Three Rail, with six and one-half inch bow and spear pickets. We cannot say too much in favor of this fence. It is very desirable and durable style. The tops of pickets are protected by the bow, preventing injury to children or stock.

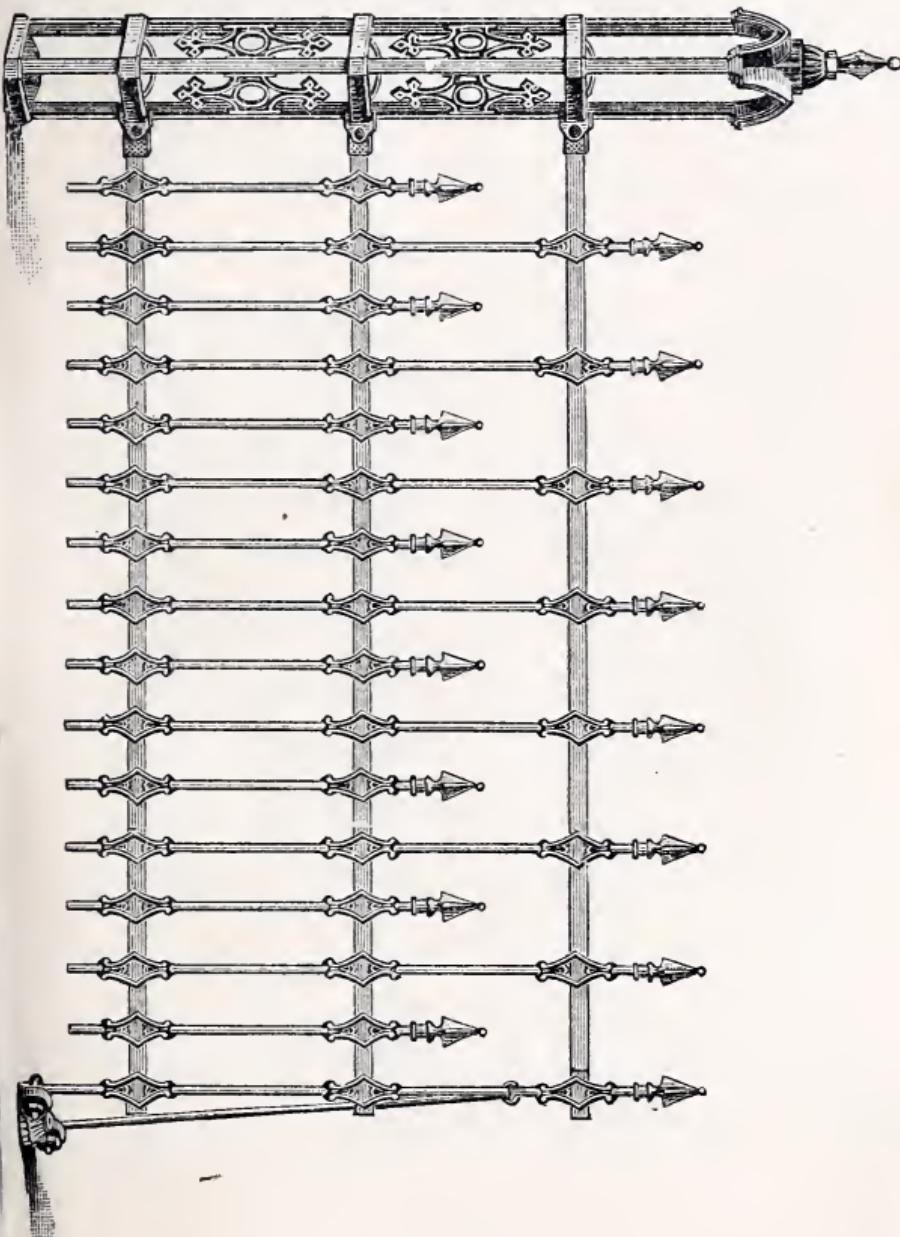

## STYLE 13.

Three Rail, with long and short pickets, spear top. Although not so elaborate as some other ornamental styles, yet the Harp Ornament makes a very handsome appearance.

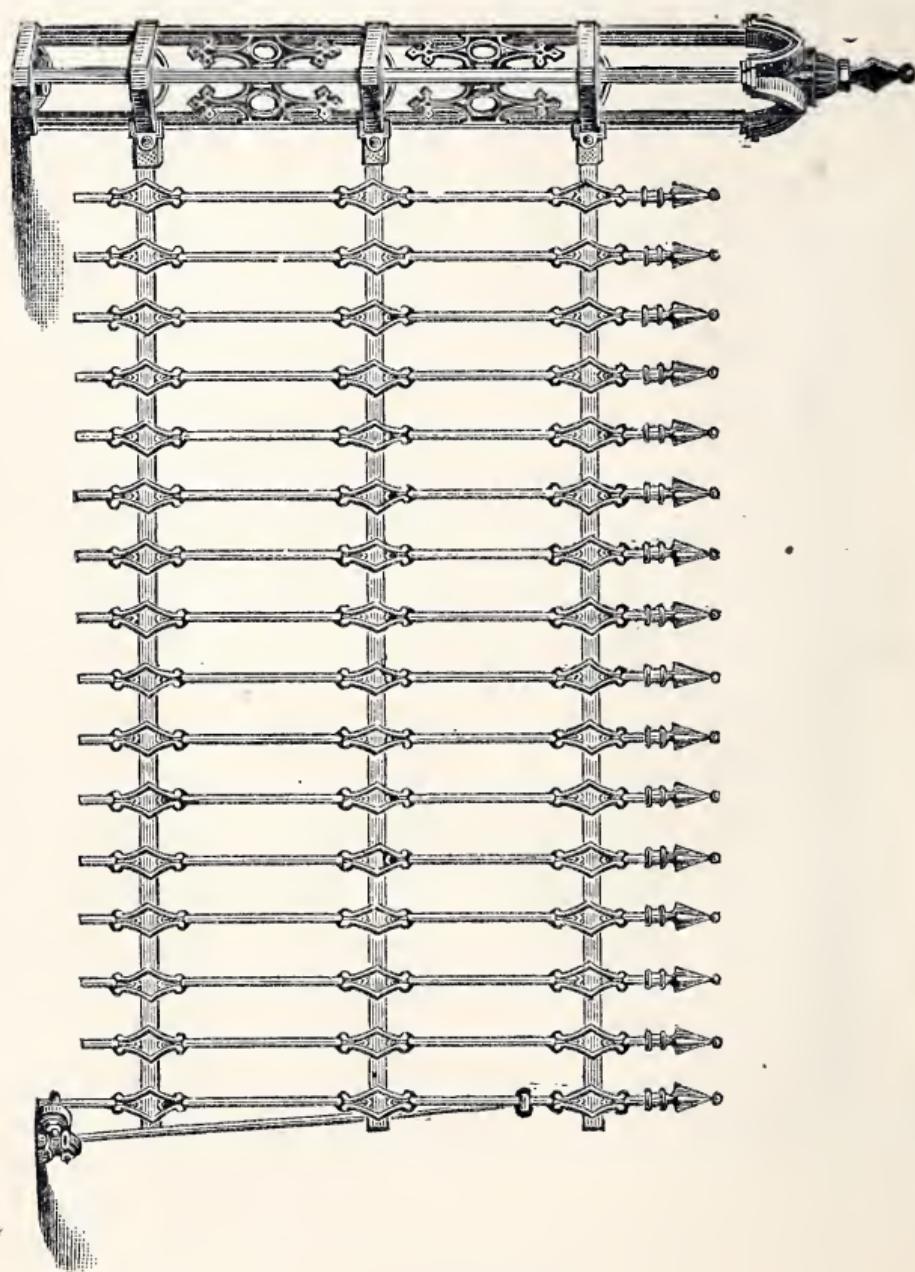

**STYLE 14.**

Three Rail, with all long pickets, spear top. This pattern is similar to Style 13, except it has all long pickets. Both styles are strong and durable, and suitable for residences. For size of rails, pickets, etc., see price list.

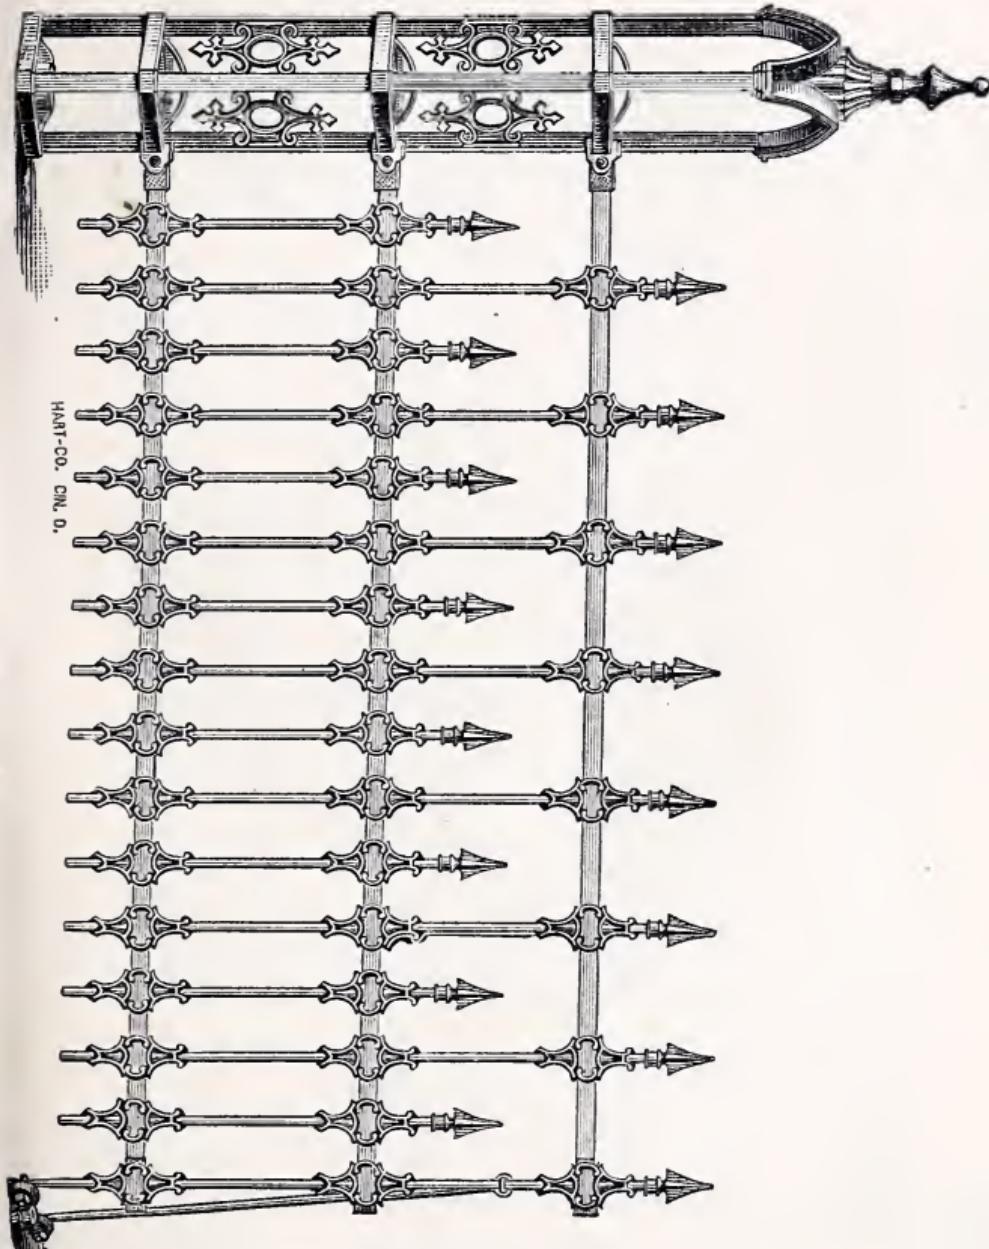

### STYLE 15.

Three Rail, long and short pickets, spear top. We can recommend this style as a strong and substantial fence. It presents a handsome appearance, and always pleases the eye. For size of rails, pickets, etc., see price list.

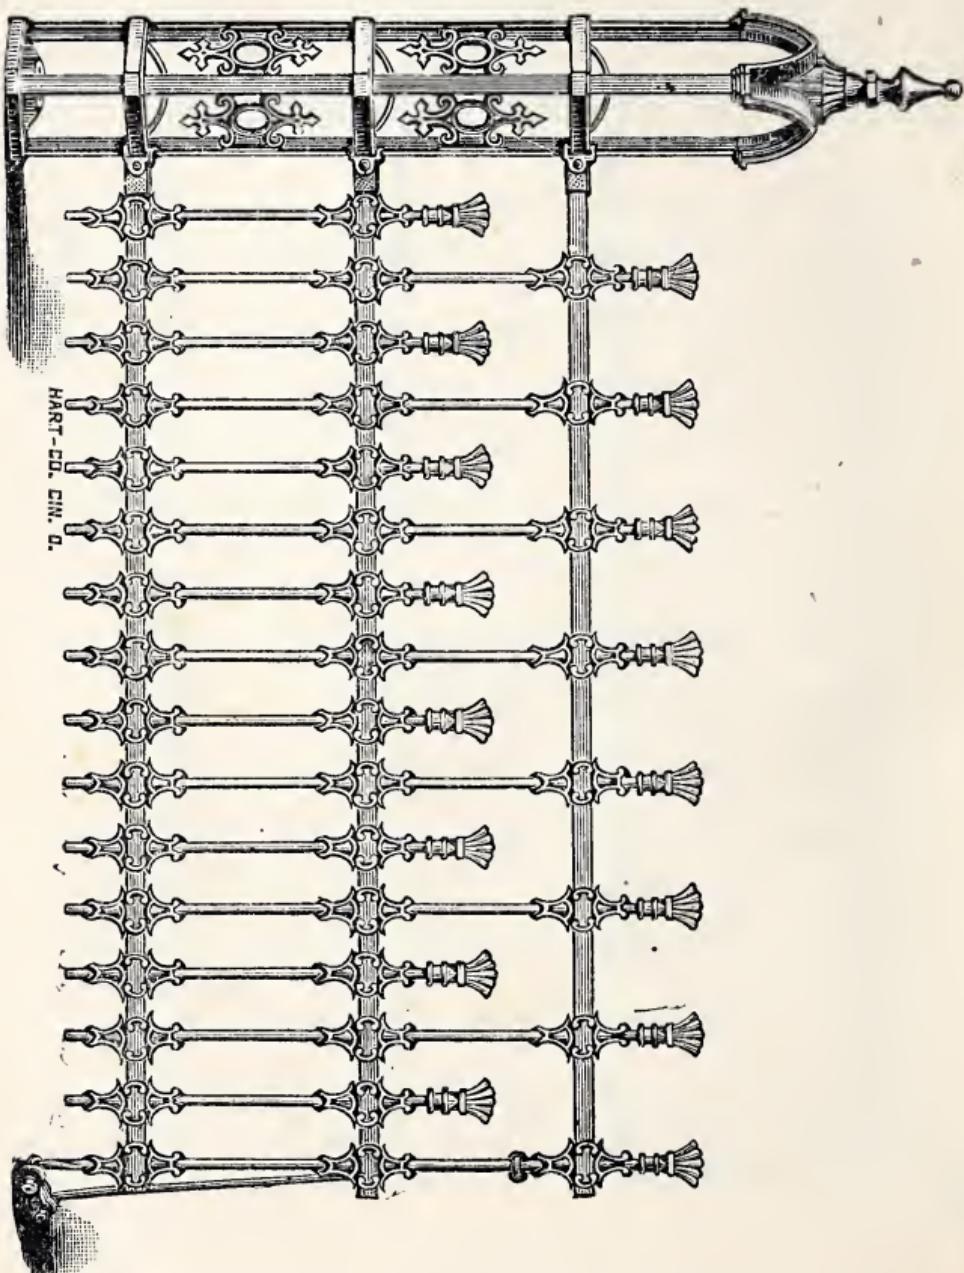

#### STYLE 16.

Three Rail, with all long pickets, spear top. This fence, when erected, presents a bold and beautiful appearance. A handsome and durable fence.

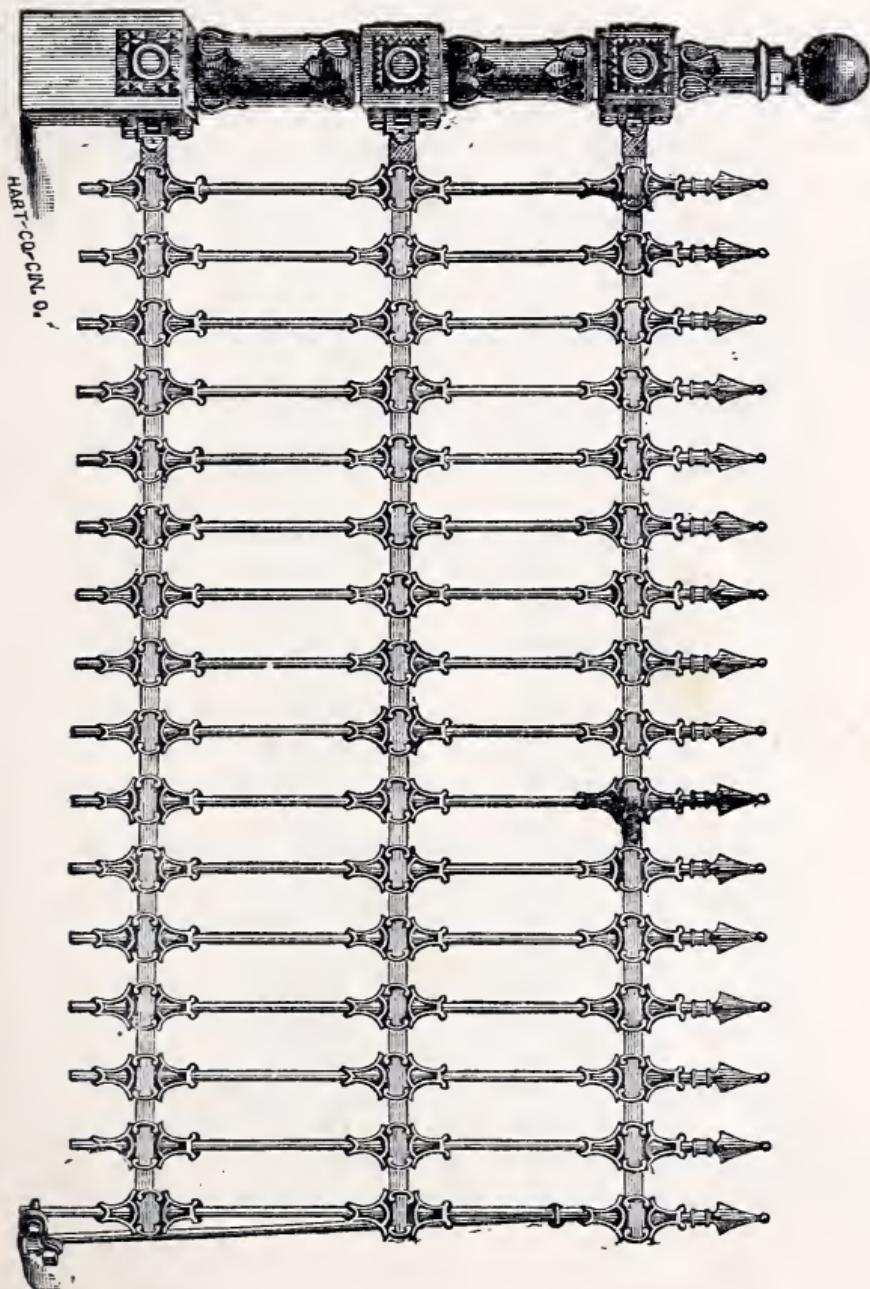

**STYLE 17.**

Three Rail, with long and short pickets, spear top. This is a new design, handsome and attractive. On this fence we use our most elaborate ornament and No. 4 Post. It is substantial, and presents a bold and attractive appearance. For size of rails, pickets, etc., see price list.

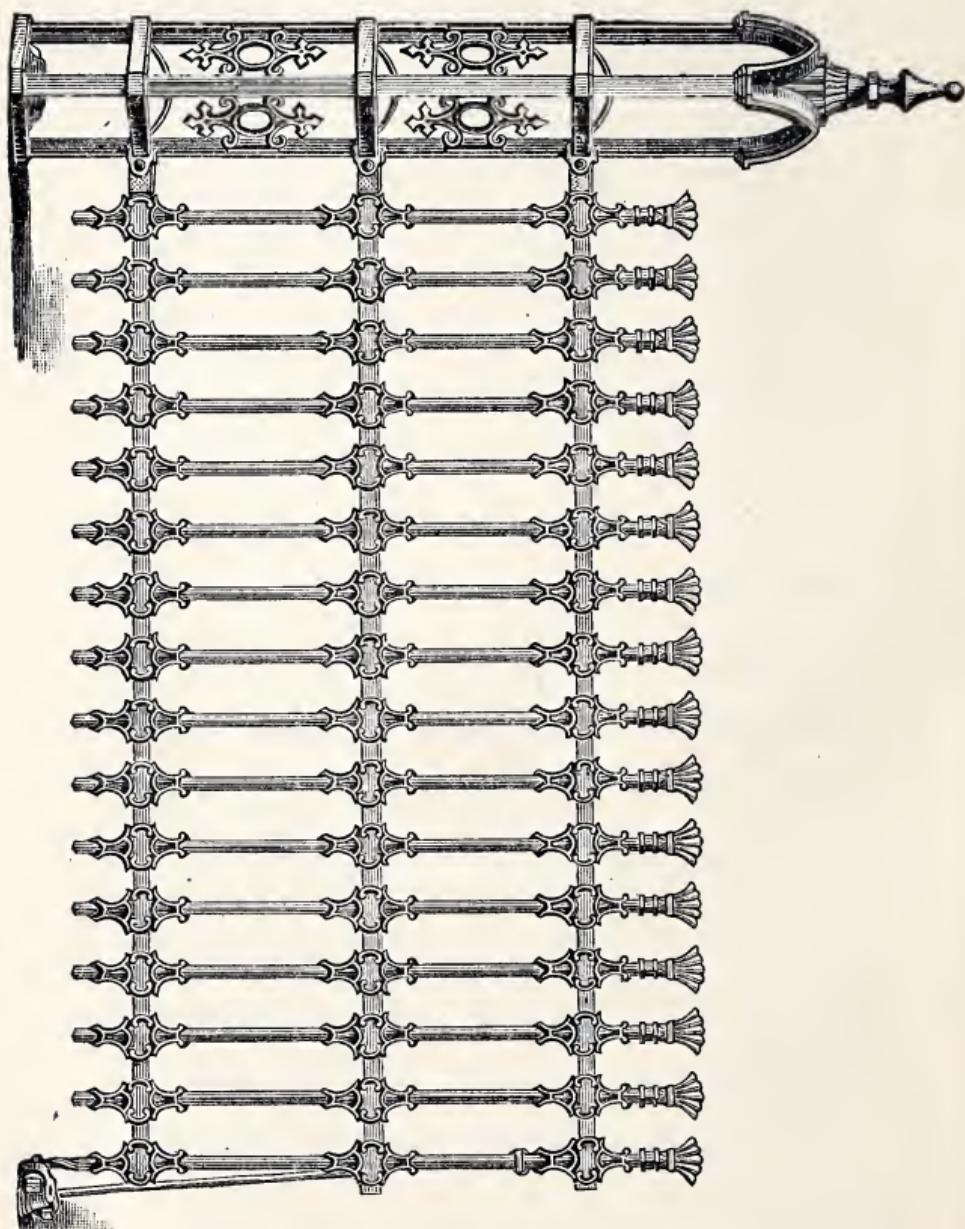

#### STYLE 17—With Eastlake Top.

Three Rail, with long and short pickets ; Eastlake tops. This is one of our latest styles, and is very beautiful in appearance.

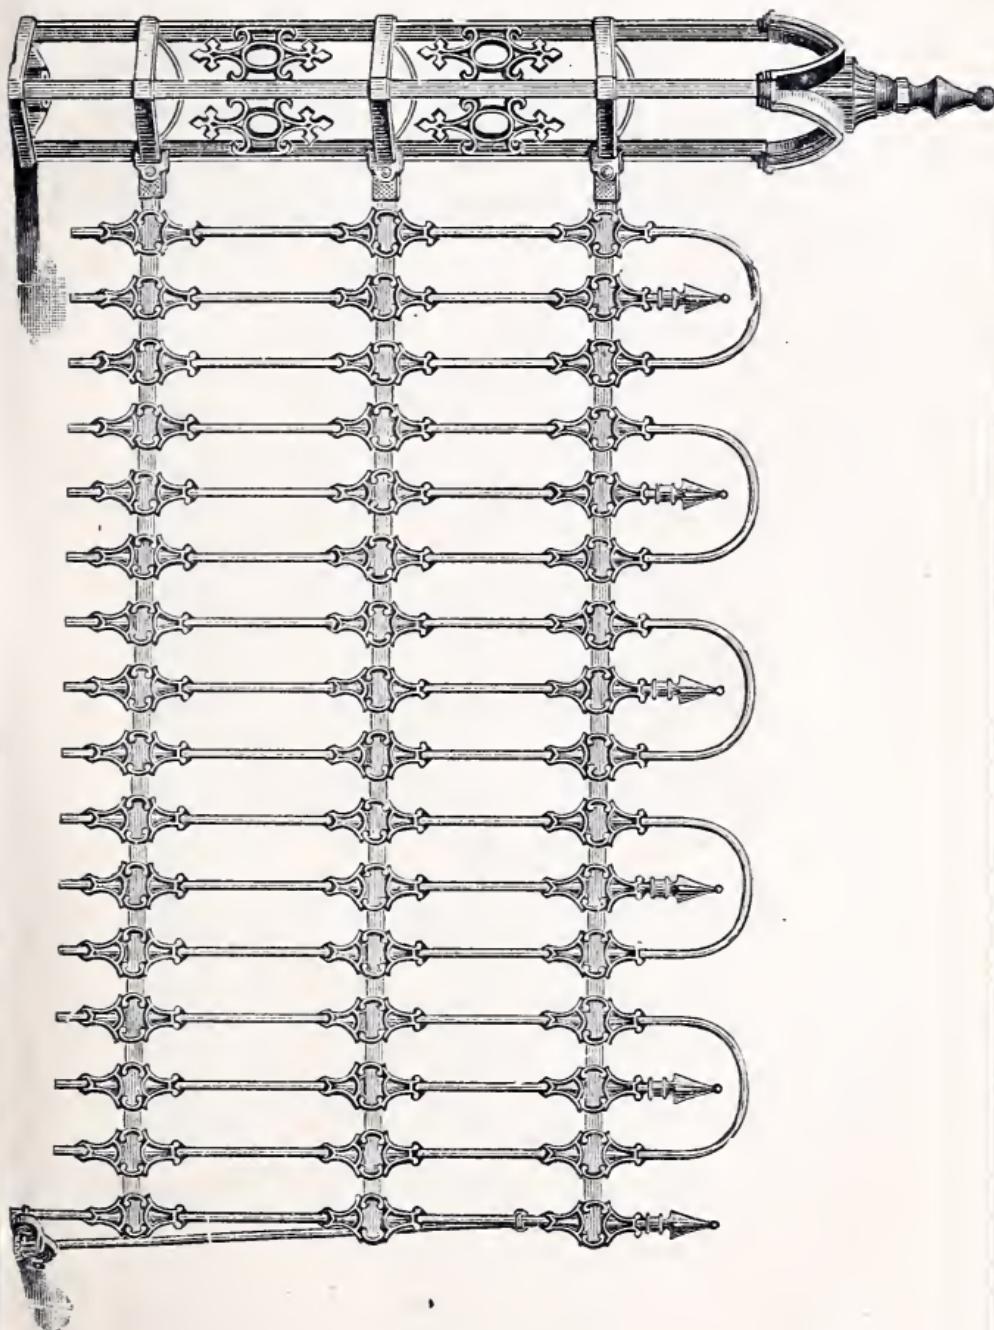

## STYLE 18.

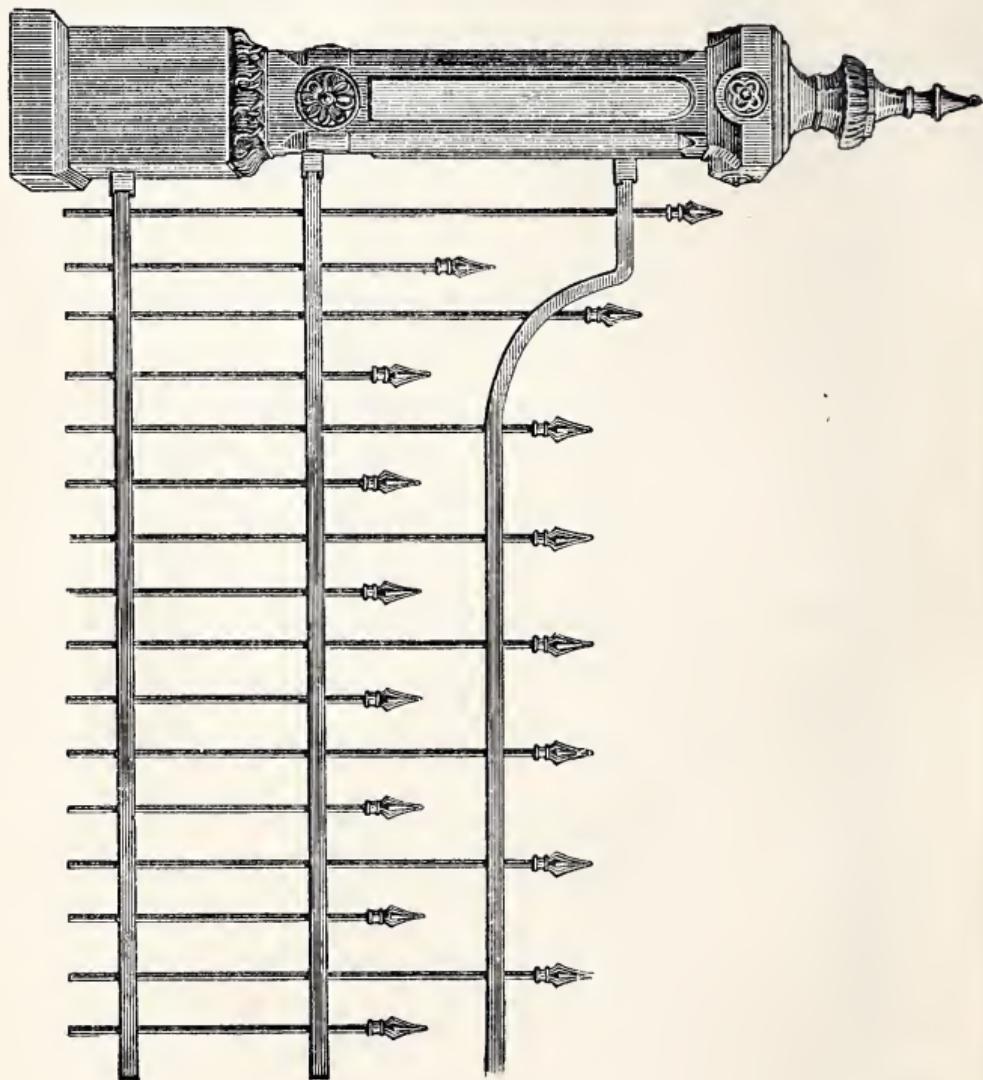

Three Rail, with No. 5½ Fancy Square Corner Post.  
A substantial and beautifully ornamented fence.

**STYLE 18—With Eastlake Top.**

Three Rail, all long pickets, Eastlake top. A new design, substantial and beautiful. For size of rails, pickets, etc., see price list.

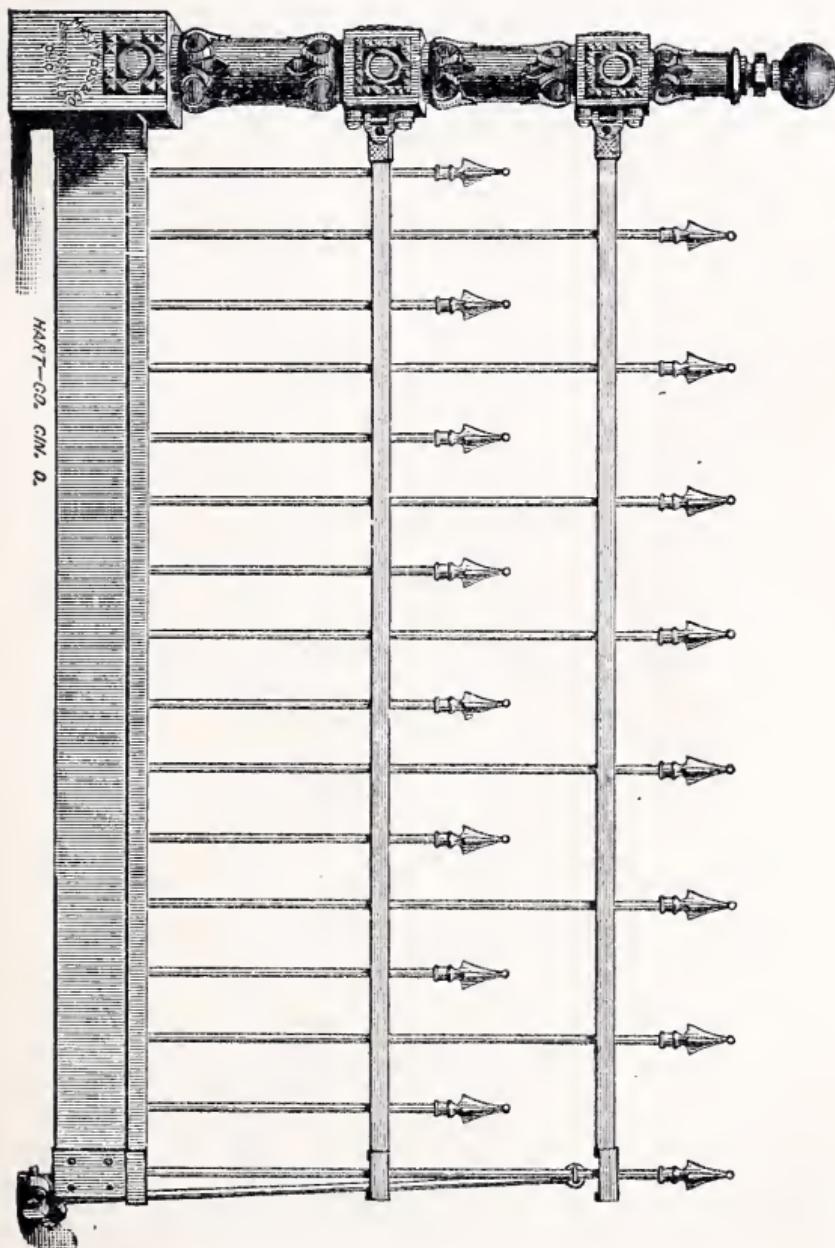

**STYLE 19.**

Three Rail, with large bow and spear picket. A new and popular style of fence. Handsome and substantial,

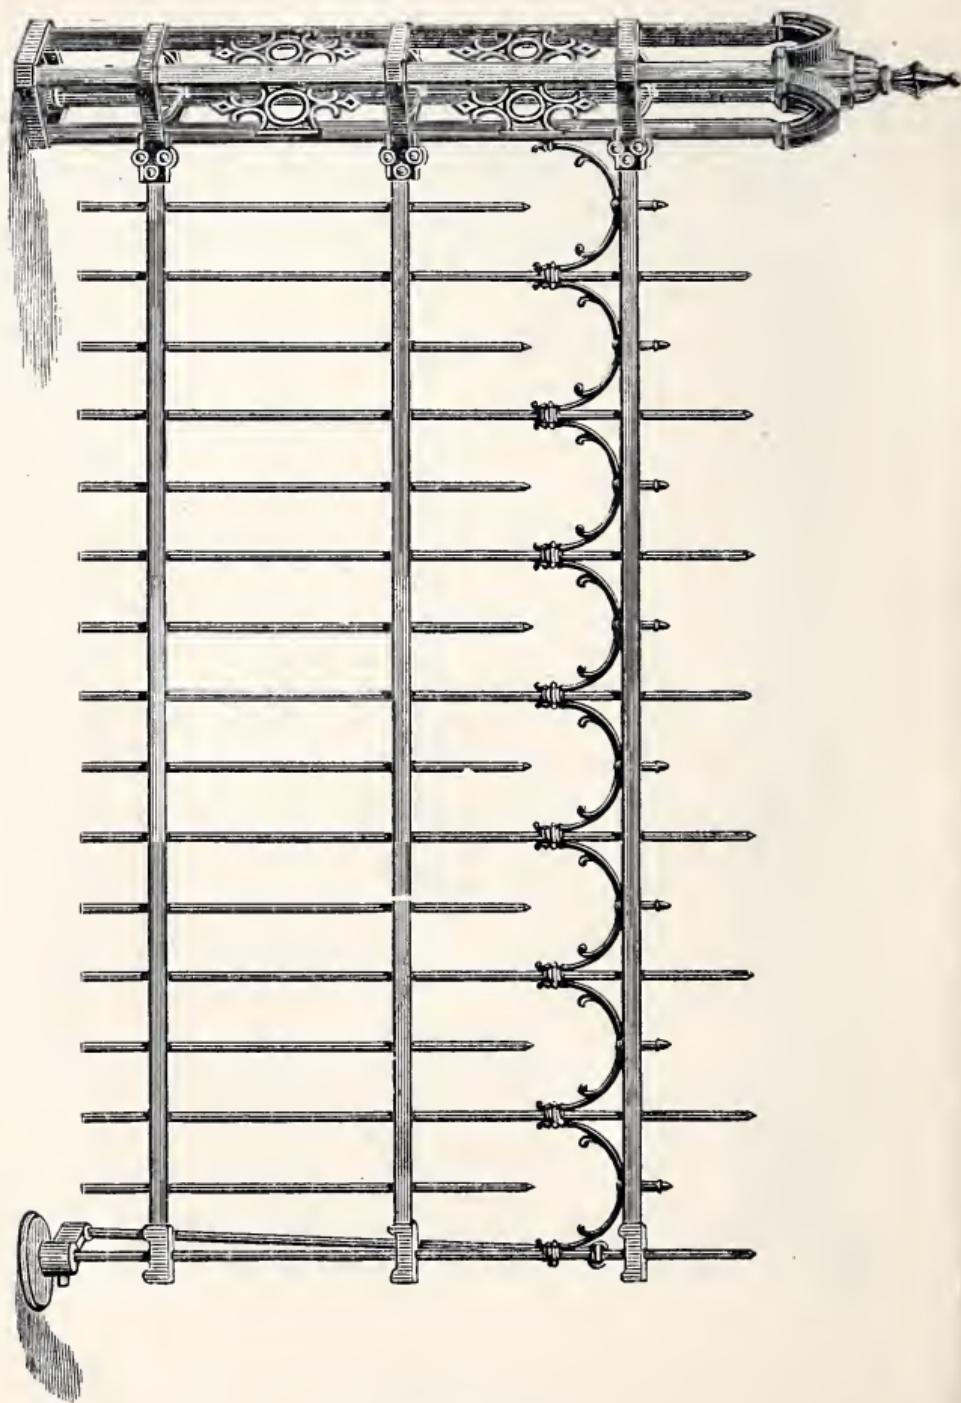

#### STYLE 20.

Three Rail, heavy spear-top picket. A strong, heavy fence, suitable for public parks, school buildings, Courthouses, and other public buildings. With this style we show our large No. 7 Ornamental Cast Post.

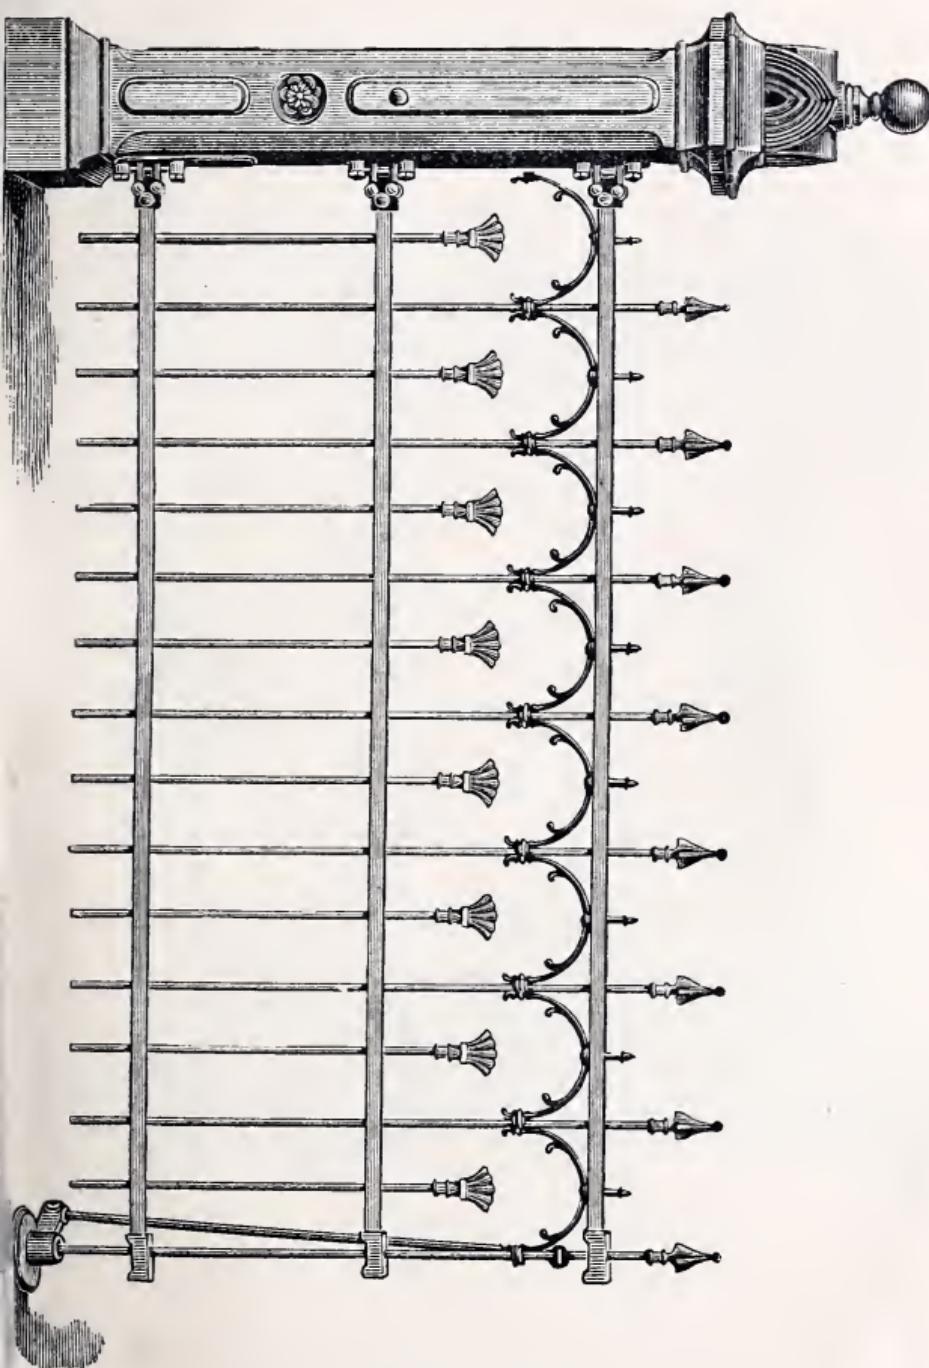

## STYLE 22.

Three Rail, with long and short pickets, spear tops. With this style we show our No. 5½ Fancy Square Corner Cast Iron Post and Wrought Iron base board. This style is suitable for a close bottom fence or where a base board is required.

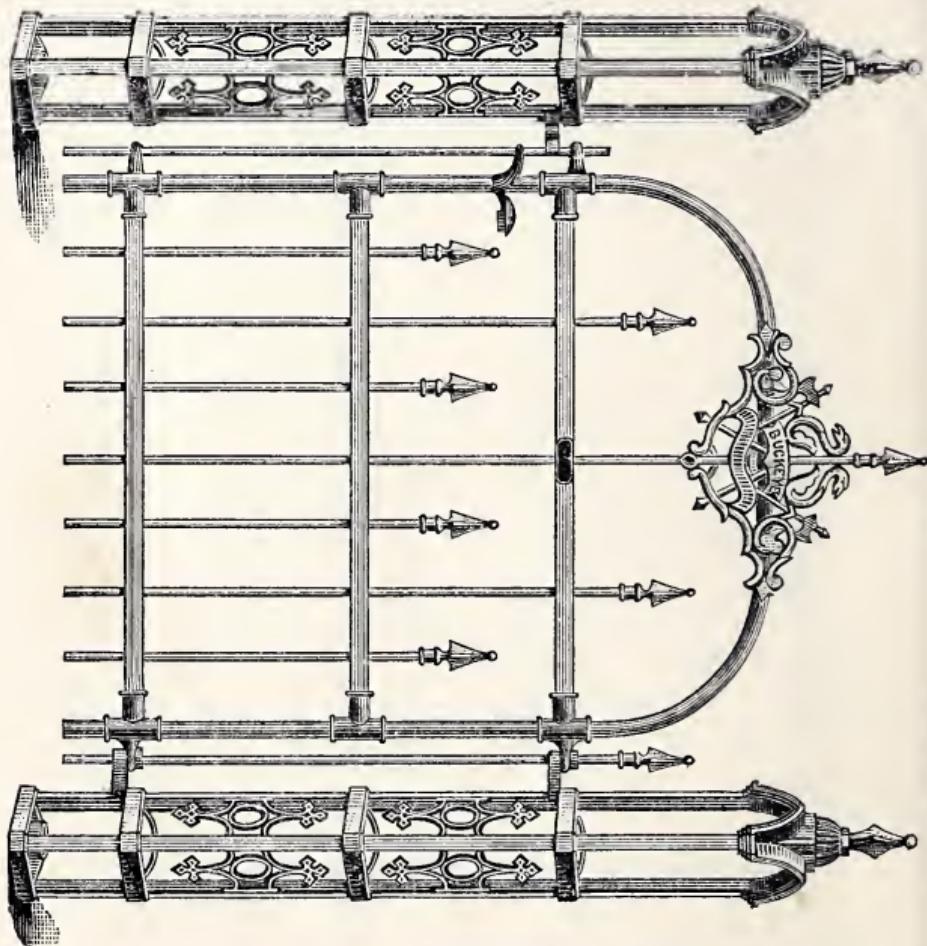

**STYLE 23.**

Three Rails, with long and short pickets. Ornaments under top rail, No. 2 Post. This is a new ornament and can be used on our style 7, 8, 9, 11, 13 or 22 Fences.

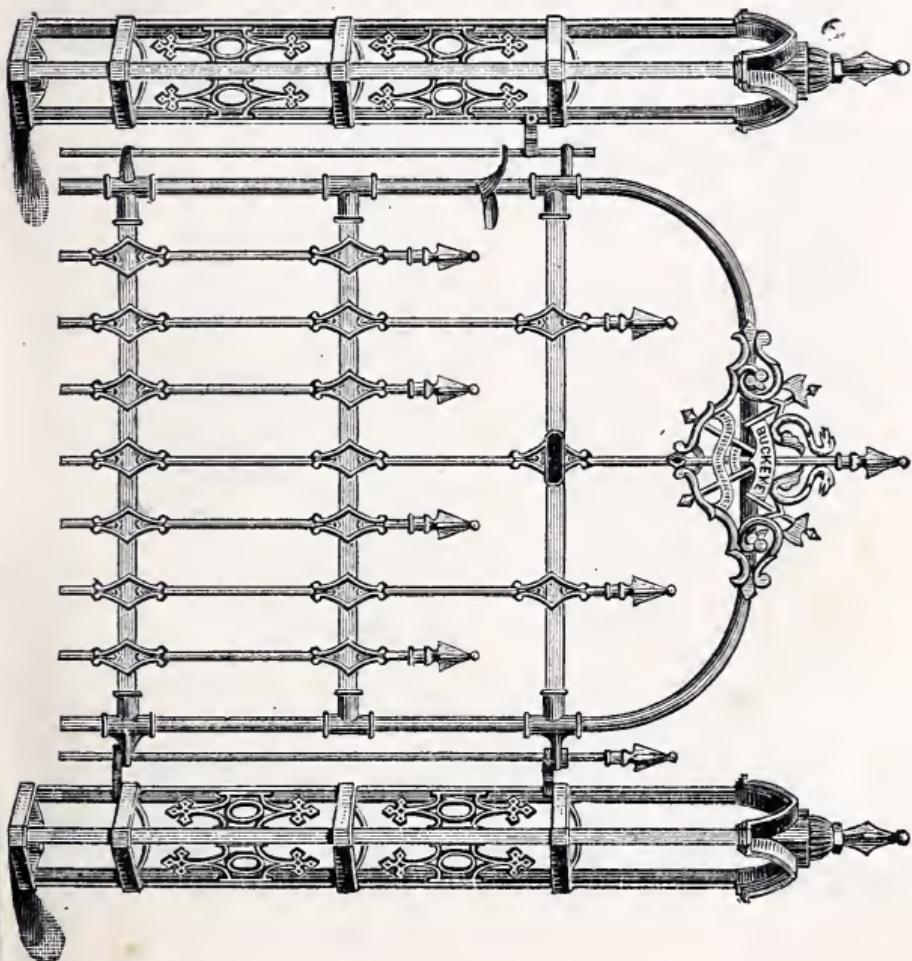

## STYLE 24.

Three Rails, with long and short pickets. Ornaments under top rail, No. 8 Post. This fence can be made with Nos. 2, 4, 5,  $5\frac{1}{2}$  or 8 Posts.

**STYLE 1.**

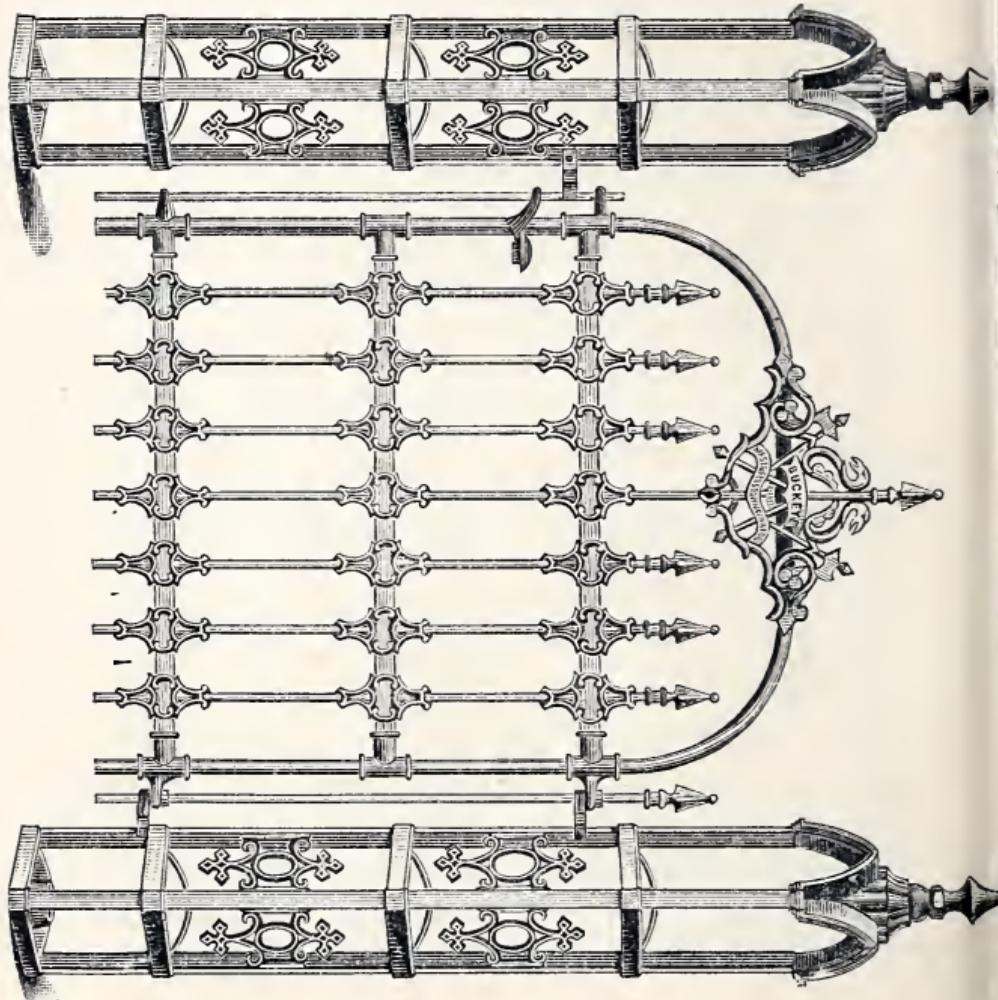

Plain Walk Gate with No. 2 Posts.

### STYLE 2.

#### Ornamental Walk Gate.

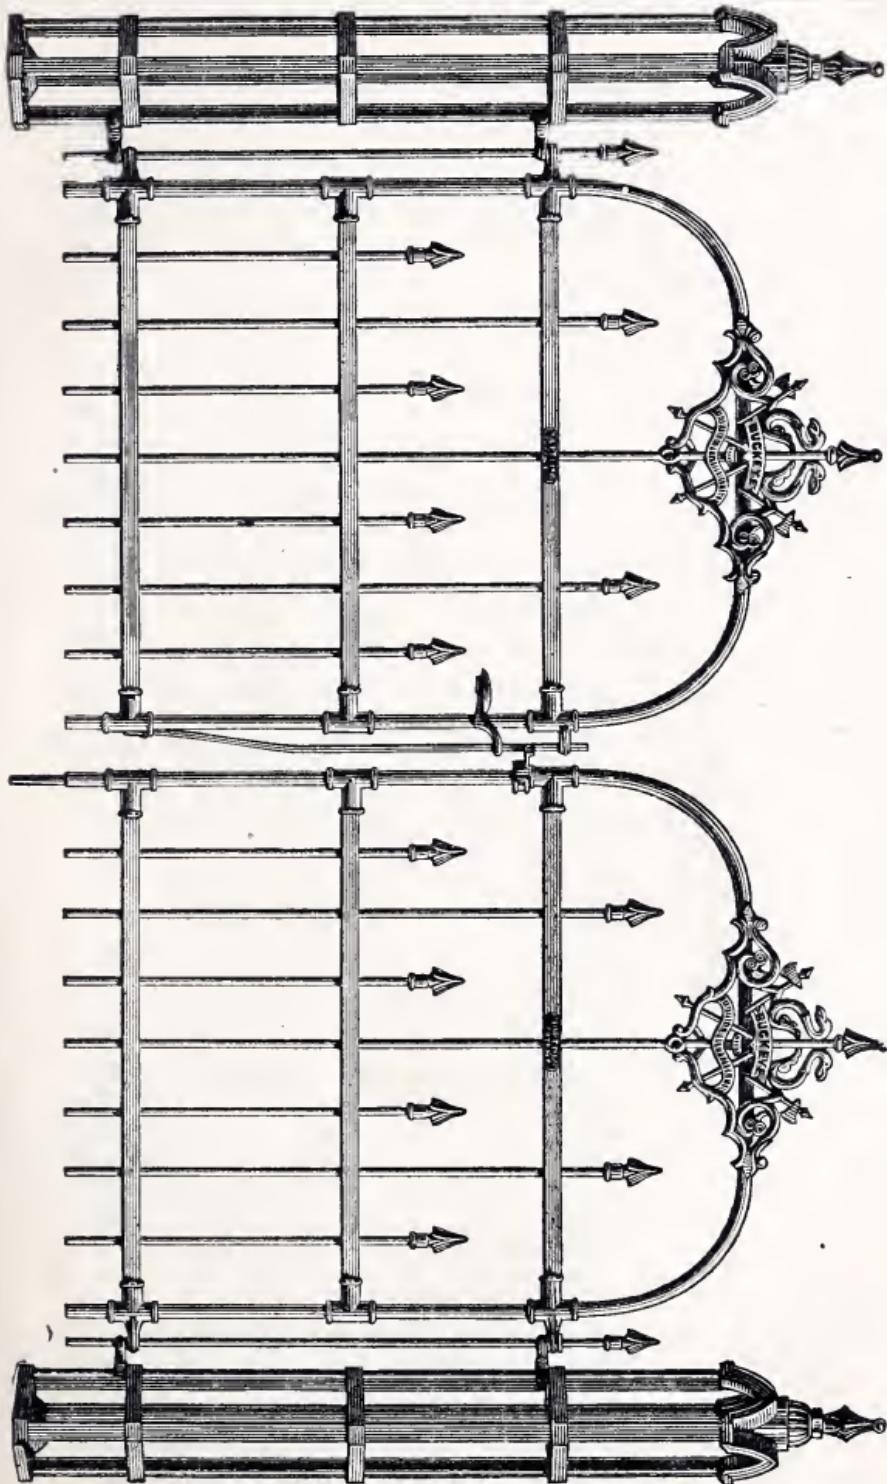

With this gate we furnish No. 2 posts, ornamented.  
Very handsome when erected,

### STYLE 3.

**Heavy Ornamented Walk Gate with No. 4 Posts.**

Our gates are all three rail, and firmly built. The outside bow or frame being all one piece makes them very strong, and will always keep their shape.

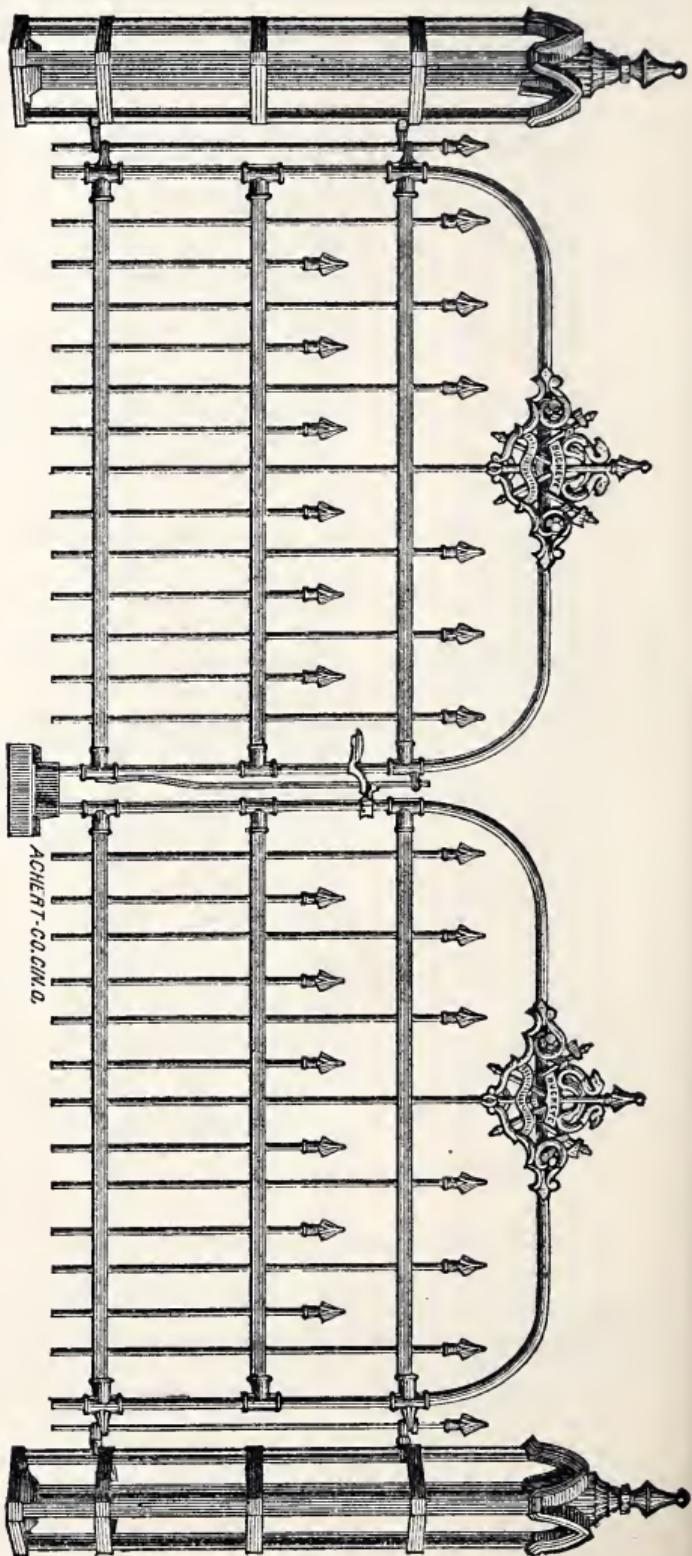

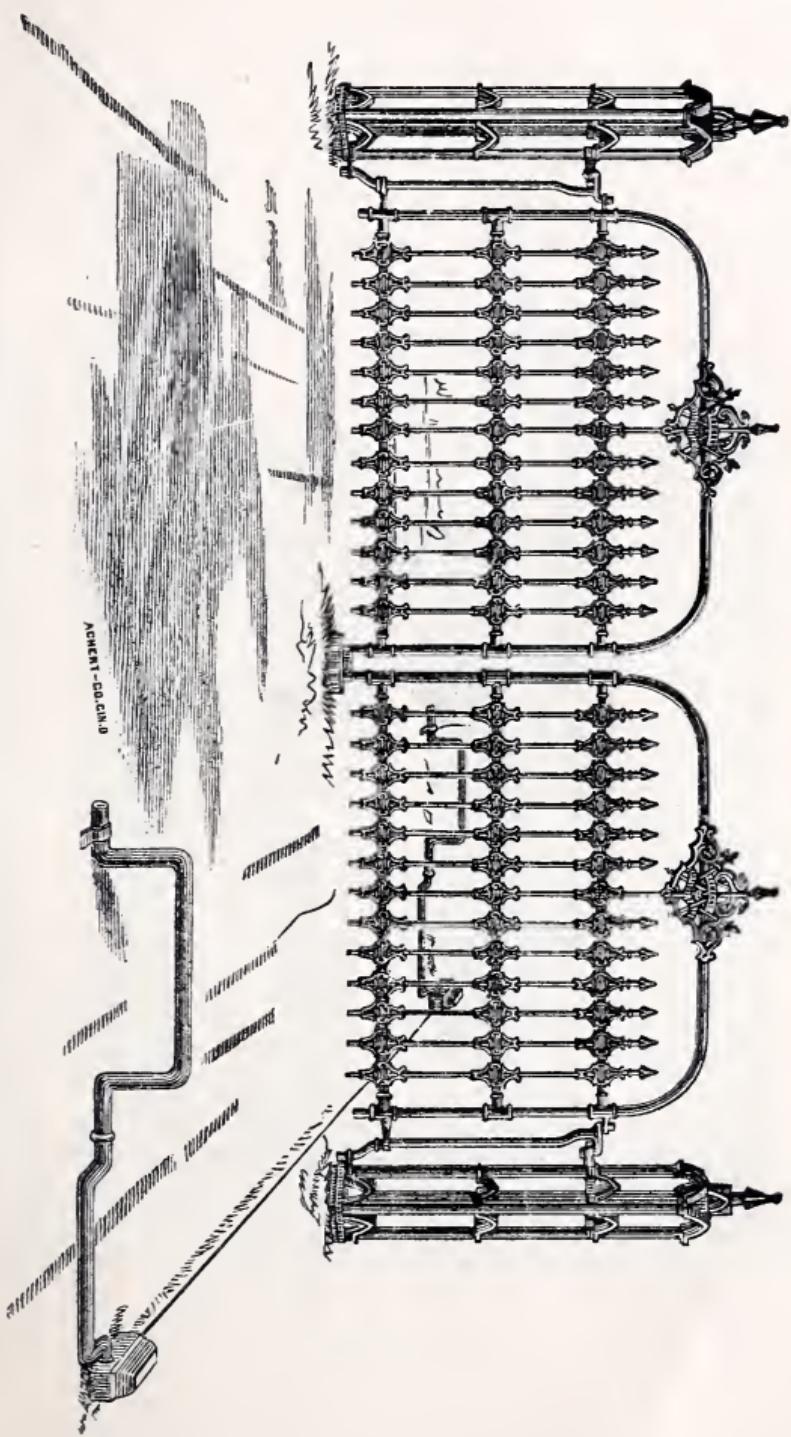

### DOUBLE WALK GATES.

We show a set of Double Walk Gates, plain. We can furnish them ornamented, similar to styles 2 and 3, as our customers may desire. We use the new style Posts with these gates, same as shown with single walk gates.

The gates shown in this cut are plain. We can furnish the same gates and posts, heavily ornamented to match any style of fence. We use the new style Posts with the gates, same as shown with the single walk gates.

HITCHING POSTS.

**No. I. PLAIN STAIR RAILING.**  
With Plain Post and Rosette Picket.

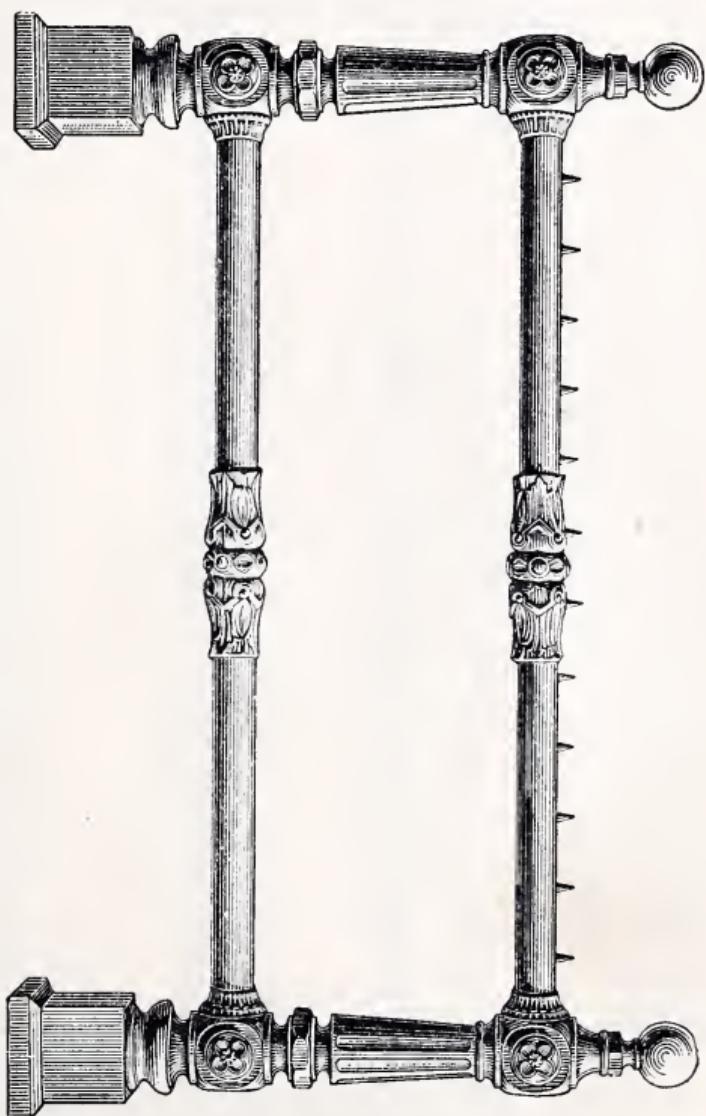

**No. 2. FANCY STAIR RAILING.**

Showing No. 5 Fancy Cast Post and Ornamented Pickets. We will ornament these Railings in any style desired.

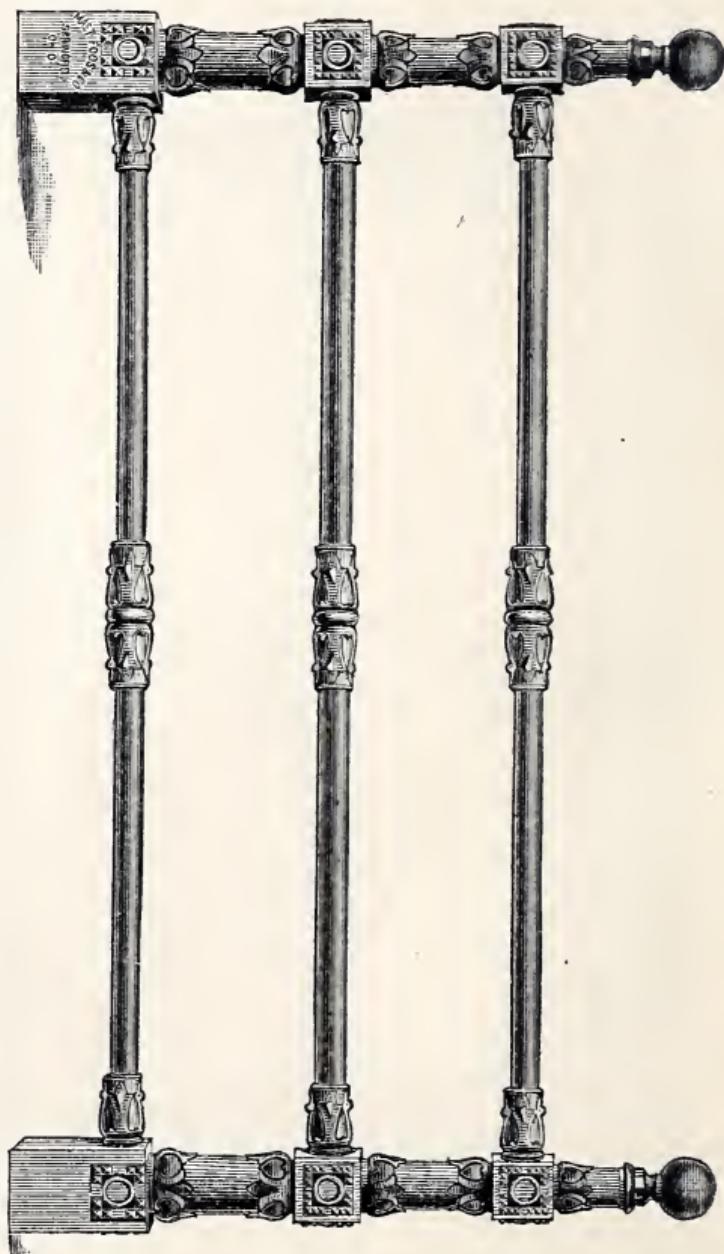

No. 3. TUBULAR IRON RAILING.

Made of gas pipe. Suitable for Court-houses, parks, etc.

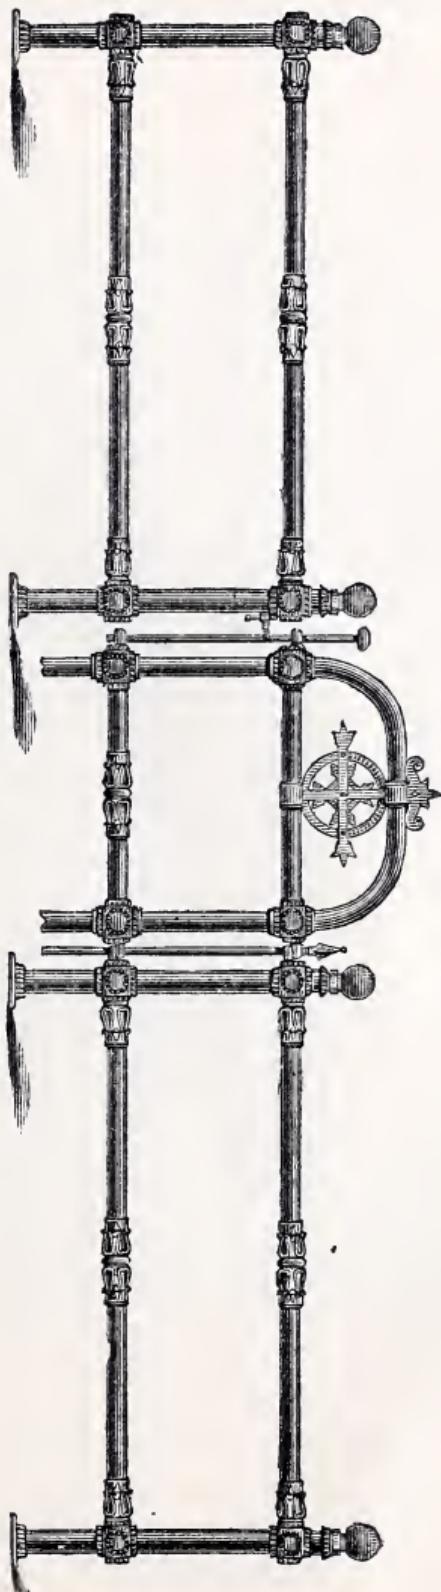

#### No. 4. ORNAMENTAL TUBULAR IRON RAILING.

This cut represents No. 6 Cast Iron Post with two inch Tubular Iron Railing ornamented with rosette in the center; also spikes on top rail. We make this style plain or ornamental, with or without spikes as desired.

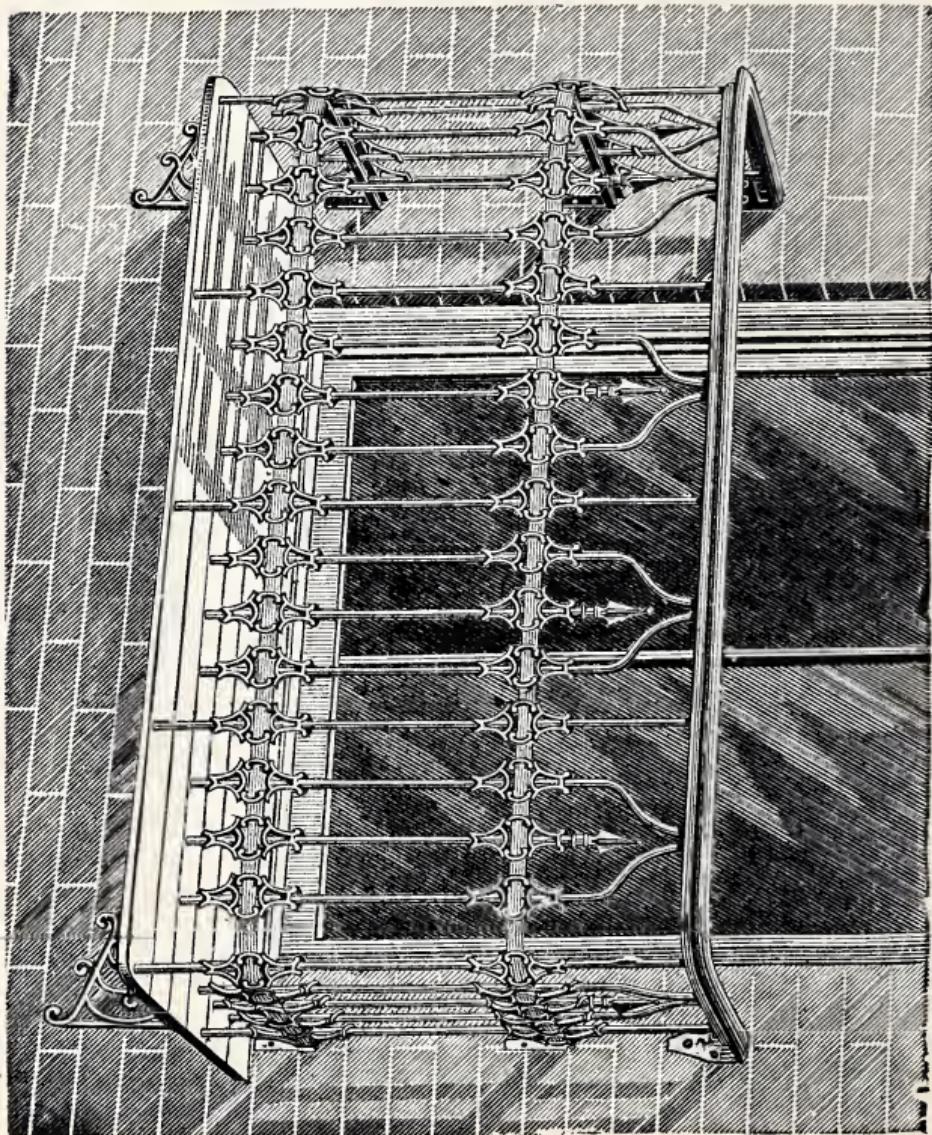

### NO. 5. TUBULAR IRON RAILING.

This cut represents Style 5½ cast iron post with 1½ inch tubular railing ornamented with rosettes in center and at ends. We make this style plain or ornamental, with or without spikes; either two or three rails, as desired.

### NO. 6. TUBULAR IRON RAILING.

This cut represents our two-inch gas pipe post, ball top, and  $1\frac{1}{2}$  inch gas pipe railing ornamented, showing gate to match, all complete as the fence will appear when erected. We make this style Tubular Railing of  $1\frac{1}{2}$  inch gas pipe post and  $1\frac{1}{4}$  inch gas pipe rail. See price list.

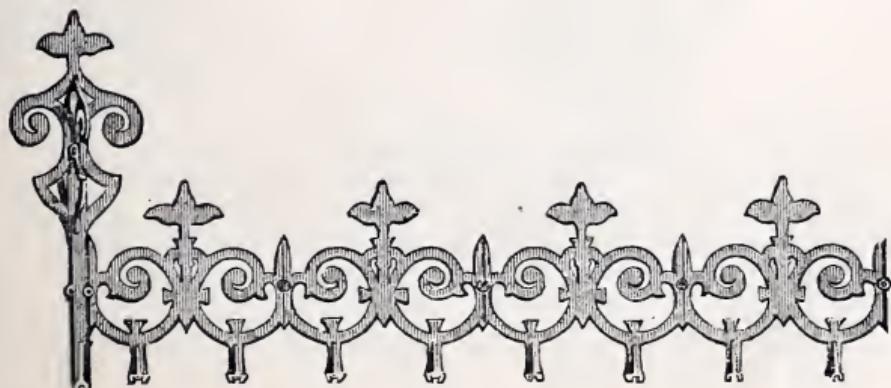

**BALCONY RAILING—\$2.00 per foot.**

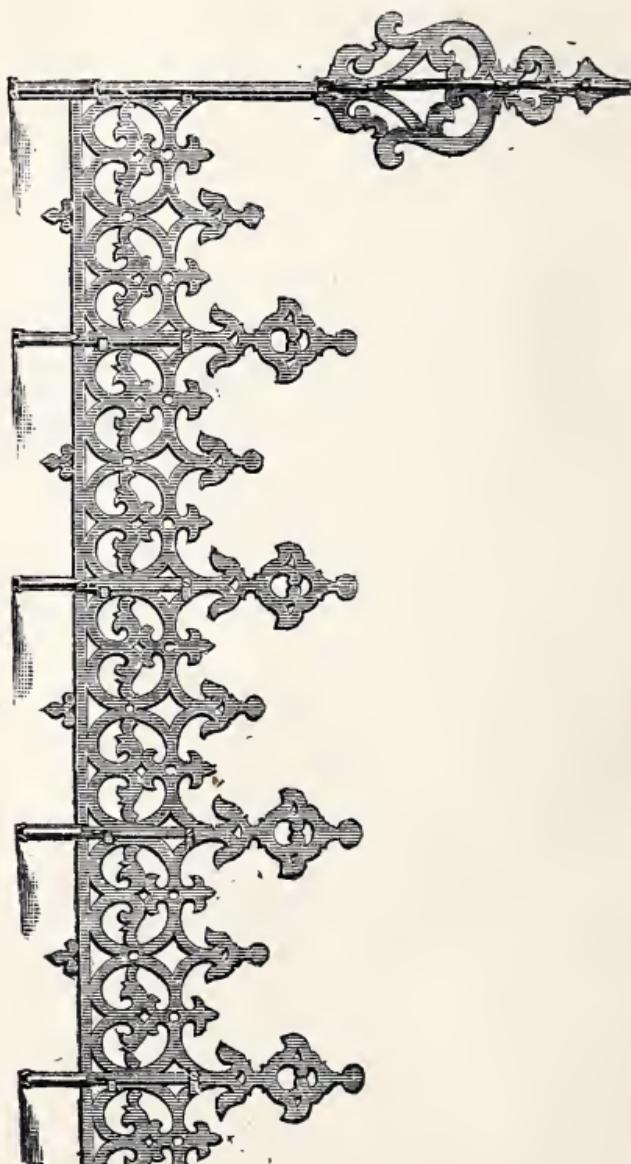

Suitable for window balconies, verandas, or porches.  
Can be made to represent any style of fence shown in  
Catalogue. 50 inches high.

**STYLE O.**

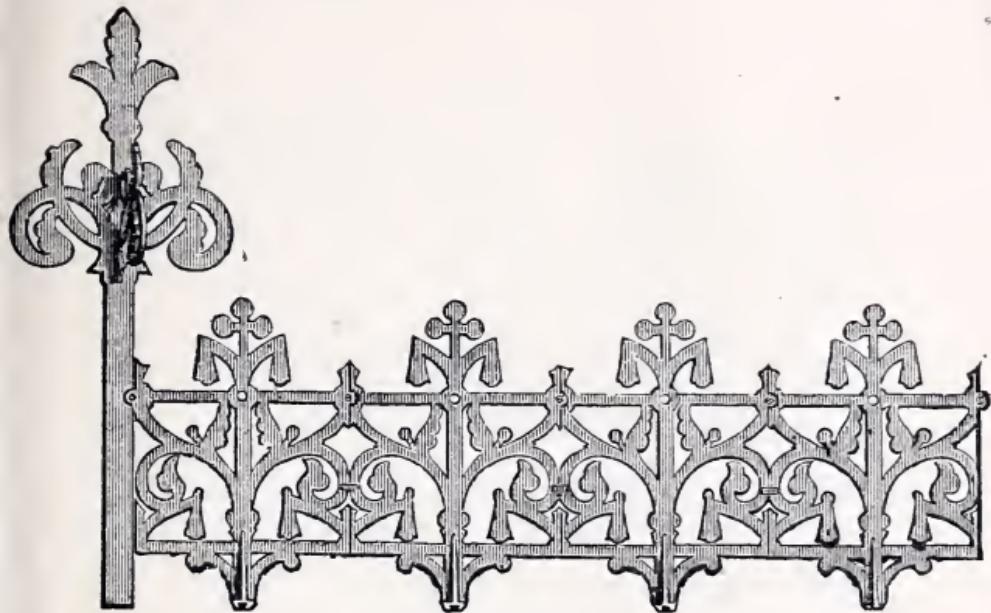

Cresting, 12 inches high; Finial 22 inches high.

**STYLE 1.**

Cresting, suitable for verandas, bay windows, etc.  
Cresting 12 inches high; Finials 22 inches high.

**STYLE 1½.**

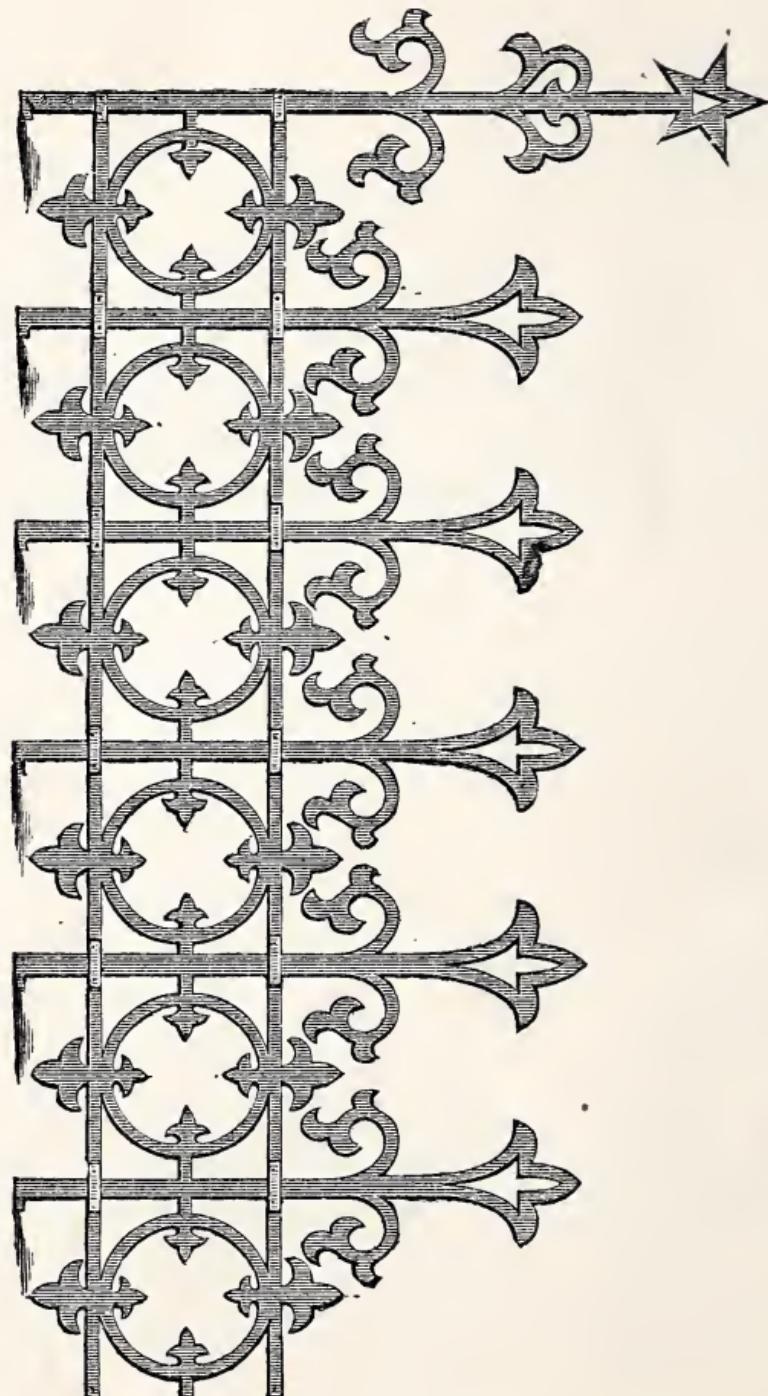

Cresting—neat and tasty. Cresting 18 inches high;  
Finials 36 inches high.

**STYLE 2.**
